

TESMANIAN

(Cooler Instruction)

Thank you for choosing Tesmanian products. Please read and follow these steps before installation

1. Gently unzip the cooler.

(Please Note: It is completely normal if the zipper feels stiff / difficult to unzip initially. Be sure not to PULL the zipper outward, but gently unzip following the zipper track.)

2. Remove the foam pieces inside of the cooler.

3. Locate the lubricant that is included inside the metal basket.

4. Lubricate the zipper pull, and all four corners of the zipper track.

5. Zip back and forth to further smooth and lubricate the zipper / track. Feel free to add additional lubricant as needed.
