

WATER

Refilling Stations Packages

March 2021

INNOVATIVE WATER SOLUTIONS INC

is Philippines' leading water treatment company.

We specialise in systems for various applications like drinking water, wastewater, swimming pools and industrial. We cater wide range of customers from residential, commercial and industrial.

Our systems use the finest equipment and parts available in the market. Each system has undergone years of technological upgrade. If a part don't pass our standard, we don't use.

With us, quality is everything.

Our main office is strategically located in the sprawling metro city of Lapu-Lapu.

WHY WATER?

There are a few necessities in life that we cannot live without: Food, Water, Clothes, Shelter, Electricity and Communication. Choosing a business in one of these fields will always succeed, depending on the demand.

When it comes to our survival, water is our quintessential need. You can only survive 3 days without water. When a business is built on a need, you can never go wrong.

Our world has hit the worst financial crisis in the last 80 years, bankrupting 80% of (SMEs) small and medium enterprises. Guess one SME that survived and thrived in trying times like these? Water Refilling Stations. They quadrupled their profits.

ONLY THE BEST

parts are used when building the water stations. Our products are sourced from all over the world with meticulous inspection over quality and packaging. We use the same equipment that is used for industrial applications at a fraction of a cost.

We have years of experience in installations to give you the peace of mind you deserve.

All our systems follow Department of Health (DOH) guidelines and protocols.

We charge

- No Royalty Fee
- No Franchise Fee
- No Marketing Fee

And we have **✗** added or hidden charges

BRANDS

We work with:

OUR PACKAGES

Purified Water Systems

SILVER Series

Beginner and Budget Friendly

Single Membrane System

GOLD Series

Best Seller

Double Membrane System

PLATINUM Series

Advanced Seller

Triple Membrane System

Optional Add on:

> Mineral Water

> Alkaline Water

SILVER

₱240,000

- Budget Friendly
- 3000 gallons per day output
- 18 Stages Filtration
- Stainless Steel skidded compact system
- 3 months supply of filters

GOLD

₱295,000

Best Seller!!

- Commercial Grade
- 6000 gallons per day output
- 24 Stages Filtration
- Stainless Steel skidded compact system
- Upgradable to Platinum System without buying a new set-up
- 6 months supply of filters

PLATINUM

₱350,000

- Industrial Grade
- 9000 gallons per day output
- 27 Stages Filtration
- Stainless Steel skidded compact system
- Larger Water Storage Capacity
- Expertly designed with ROSA software to save energy and produce more water
- 12 months supply of filters

SILVER SERIES

We understand the need for our clients to meet their business aspirations in a budget friendly way. Best part is that as your business grows, you can always upgrade the parts without changing the core system. Now that's awesome!

SILVER SERIES PURIFIED WATER SYSTEM

System Features:

- **Water Output:** 20 5gallon containers per hour / 400 5gallon containers per day
- **Power Input:** 220V 60Hz Single Phase
- **Water Source:** Ground Water (Deep Well) / Municipal Water (max 2000ppm Total Dissolved Solids)

Additional Features

- Expert RO design from ROSA
- AFM® Filtration down to 1 micron (25 meter clarity of purified water)
- Real time water quality monitoring
- Backwash only when needed
- UPVC pipes and fittings (5 times stronger than blue pipes and fittings)
- Simplicity of user interface
- Power Surge Protection

System Benefits:

- Hassle Free Operation (Auto on/off)
- Very Low Maintenance
- Energy Saver
- Water Saver

System Technical specifications

- 1 pc 1000L Stainless Steel Raw Water Tank with auto on/off switch
- 1 pc 1500L Stainless Steel Product Water Tank with auto on/off switch
- 2 set Stainless Steel High Quality Booster Pumps with automatic pump control
- 1 pc Stainless Steel High Quality RO Pump with pressure regulator
- 1 set AFM® Activated Filter Media Filtration Tank (Sole Distributor PH)
- 1 set Shanxi® Carbon Activated Carbon Filtration Tank
- 1 set Purolite® Resin Water Softener Tank with initial salt loading
- 1 set Energy Saving Polyamide Brackish Water RO membrane w/ SS housing
- 1 Stainless Steel UV Sterilization Set
- 2 Stainless Faucet Sets
- 4 sets Hydrosep RO filters for pre & post filtration
- 1 set RO Water Quality Monitor
- 1 lot gray UPVC pipes and fittings sched 20

SILVER SERIES PURIFIED WATER SYSTEM

Lot Requirement:

- Minimum of 25 sqm floor area
- Drainage Required (Our salesperson will guide you)

Benefits of working with us:

- Over 10 years of installation experience
- Fast Installation time (full installation within 2 weeks from date of down-payment)
- One (1) year free service warranty
- Best After-Sales support
- Full guidance on marketing
- Stand-by technical support at all times
- **Initial feasibility study to know ROI and profit plan (1st in the Philippines)**

Freebies:

- 50 pcs 5gallon containers with non-spill caps
- 2000 pcs bottle seals
- 1 pc Heat Gun
- 1 Liter Dishwashing Liquid
- RO filters replacement (1 each)
- Floor Layout
- Sink Layout
- Stainless Steel Skid for the system
- Transport and Delivery (Additional charges for out of Metro Manila, Metro Cebu and Metro Davao)
- Training on operation
- Complete set-up and ready to operate

BUILDING, PERMITS and SINK are excluded

Total Project COST: P240,000.00 (VAT exclusive)

Add-on:

Mineral Water: P30,000.00 (VAT exclusive)

Mineral + Alkaline: P60,000.00 (VAT exclusive)

Additional services:

4 camera installation Hik-Vision: P20,000.00

GOLD SERIES*

Our best selling system. It comes with increased purified water production and better performance in terms of energy and water recovery. It's also upgradable when increased production is required.

GOLD SERIES PURIFIED WATER SYSTEM

System Features:

- **Water Output:** 38 5gallon containers per hour / 749 5gallon containers per day
- **Power Input:** 220V 60Hz Single Phase
- **Water Source:** Ground Water (Deep Well) / Municipal Water (max 2000ppm Total Dissolved Solids)

Additional Features

- Expert RO design from ROSA
- AFM® Filtration down to 1 micron (25 meter clarity of purified water)
