Vertical Assembly

Mounted with a table surface clamp.

In its vertical form, the iPad Connect Arm can be clamped to the edge of any table surface using an industry grade hand-screw mechanism. Versatile rotation functionality is built to withstand even the busiest back-of-house use, and a full range of swift angle adjustment allows for continual use throughout the workday. The iPad Connect Arm mounts securely to any of our protective iPad Connect Cases, or device ambiguous Universal Connect

Adapter, and is built with robust anodised aluminum for complete peace-of-mind.

Mounted vertically, the Connect Arm can stand as tall as 600mm when fully extended, and offers more than 200° of rotation from various points of adjustment throughout the arm.

Wall Mounted Assembly

Mounted with included mounting plate + 4 screws.

In its wall mounted form, the iPad Connect Arm can be securely mounted to any sturdy wall surface using the mounting plate provided. This assembly is achieved by unscrewing the bottom length of the arm, allowing it to reside closer to the wall, removing any occupational health and safety concerns, as well as saving valuable space in a busy back-of-house environment.

The iPad Connect Arm mounts securely to any of our protective

iPad Connect Cases, or device ambiguous Universal Connect Adapter, and is built with robust anodised aluminum for complete peace-of-mind.

Wall mounted, the Connect Arm can sit up to 400mm from the wall when fully extended, and offers more than 200° of rotation from various points of adjustment throughout the arm.
