

Christmas Flowers – Diane Dillon

All designs will be constructed in the 4X4 hoop

Follow these instructions for ATWDD-0188 through ATWDD-0192:

- 1) Hoop stabilizer
- 2) Cut a piece of mylar 4" X 5". Secure corners onto stabilizer with tape.
- 3) Work through color changes to complete the design. When the design is finished, carefully and slowly tear mylar away from the design. You may need to use a tweezer to remove smaller pieces.

For ATWDD-0193:

- 1) Hoop stabilizer
- 2) Cut a piece of mylar 4" X 5". Secure corners onto stabilizer with tape. If you refer to the worksheet and see where the design stitches, you can use a smaller piece of mylar, if desired.
- 3) After stitching step #5 – the red border for the ornaments – remove hoop from machine but **DO NOT REMOVE FABRIC FROM HOOP**. Carefully and slowly tear mylar away from the design.
- 4) Return hoop to machine and continue to work through color changes to complete the design.
