

TRUETRAC

Engineered Copolymer Soil Stabilizer & Dust Control Agent

- Read Material Safety Data Sheet before using this product
- Keep out of reach of children
- For industrial and professional use only
- Protect from Freezing

FIRST AID

Inhalation: no treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice. **Skin:** remove contaminated clothing. Flush exposed area with water and follow by washing with soap. If persistent irritation occurs, obtain medical attention. **Eyes:** flush with copious quantities of water. If persistent irritation occurs, obtain medical attention. **Ingestion:** if swallowed, do not induce vomiting; transport to nearest medical facility for additional treatment.

SPILLS

Slippery when spilled. Avoid accidents and clean up immediately. Prevent from spreading or entering drains, ditches or open bodies of water by making a barrier with sand, earth or other containment material. Reclaim liquid directly or in an absorbent such as clay, sand or other suitable material and dispose of properly.

Directions:

Prepare the TrueTrac dilution. The required dilution ratio for your particular usage depends on many factors including humidity, direct sunlight, soil absorption rate, and others. As a general rule, start with 15 parts water and adjust as necessary.

Fill your application equipment with your TrueTrac dilution.

Apply the TrueTrac dilution evenly over your soil. For longer lasting results and soil stabilization, apply the True Trac dilution in 2 or 3 coats over the treatment area.
