GET TO GRIPS WITH THE

MOVE Motor Klaw
**BUILD INSTRUCTIONS**

1. **Connect a horn to the servo axle and gently rotate clockwise until it stops. Then rotate back an 1/8 turn.**

2. **Remove the horn from the servo and follow the diagram to assemble the rest of your Klaw.**

   **Note:** There are two kinds of Klaw in this kit! Swap out this pincer to switch between builds (see step 4).

3. **Check these screws are loose enough that the pincers can rotate freely.**

   Take care not to damage the servos wires when tightening these screws!

4. **Attach to your :MOVE Motor using the M4 bolt into the mounting hole as shown below, then connect the servo lead to one of the servo pin headers on the :MOVE Motor. You can mount the Klaw vertically or horizontally based on which mounting hole you use.**
