

# Pets are Animals too

A pet is an animal  
that lives with you,  
a special friend  
who is always true.

Many different pets  
can be found.  
To find a pet you like  
just look all around.

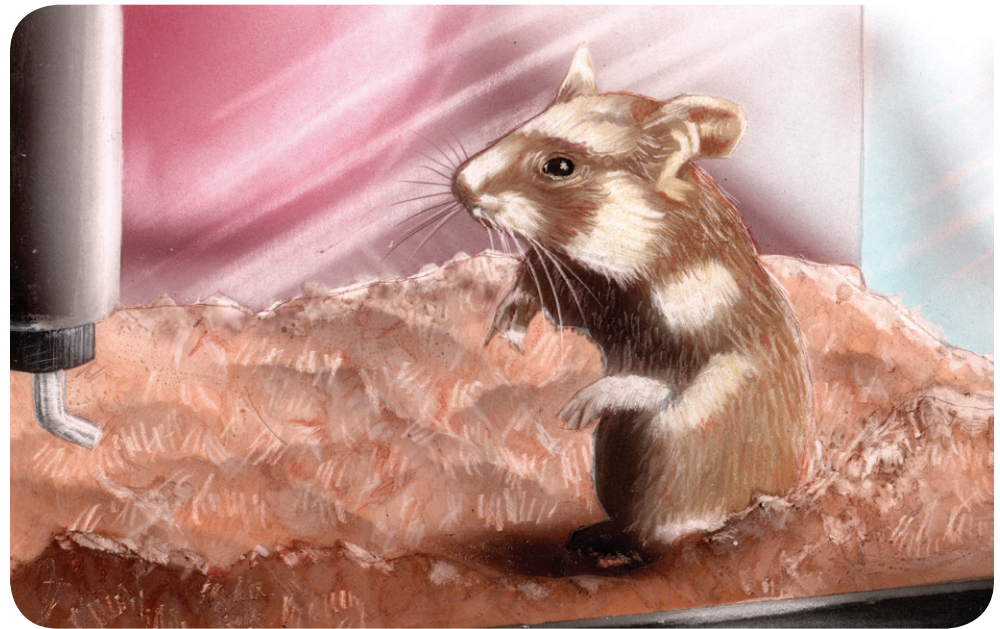

Dogs can come  
in all shapes and sizes.  
They wag their tails  
and do tricks for prizes.

Cats have thin whiskers  
and tails that are long.  
They can jump very high  
'cause their muscles are strong.

Parrots are pets  
that can learn how to talk.  
They have pretty feathers,  
and they sometimes squawk.

Fish live in water,  
and they like to swim.  
They have lots of scales  
and pretty little fins.

Land turtles and lizards  
are not like fish.  
They need just a little water.  
You can put it in a dish.

Gerbils and hamsters  
like to dig in the ground.  
In their squeaky wheels,  
they run 'round and 'round.
