Welcome to the world of Dycem non-slip

Dycem is such a simple product, but when you begin to list all the uses, you realize what a vital piece of equipment it is.

It has a positive impact not only in the home, but also at work, and during leisure pursuits. Within these settings every individual will use it differently to help reduce pain, protect joints, locate items or increase independence.

The versatility of the Dycem products means they are an essential piece of 'kit' for the young, old and everyone in between. One product is used for many, many purposes.

This booklet includes some of the uses we have come up with, but **how does Dycem make your life easier?**

A handwritten signature in black ink that reads "Jen".

**Jen Cave-Ayland,
Occupational Therapist**

Dycem non-slip products are non-sticky but grip on both sides to prevent movement. They are ideal for improving grip, providing support, stability, visual cues and confidence during everyday activities and exercise.

Dycem non-slip:

- ✓ Multi-purpose - grips, holds & opens
- ✓ Long lasting - easy to clean
- ✓ Non-toxic and latex free
- ✓ Built-in antimicrobial - silver
- ✓ The professional's choice
- ✓ Award winning
- ✓ Simple to use

The Dycem story

It all began in the 1960's when David Cecil Mills, an innovative consultant engineer working in Bristol, discovered a special polymer with very high grip properties.

The original products were non-slip trays and coat hangers, which were sold in various niche retail outlets.

The company's original non-slip product line soon developed into a large range of products addressing numerous types of stabilization and gripping problems. Dycem was born...

Dycem is now a long established British manufacturing company with a strong reputation for quality and reliability.

Dycem is internationally recognized under the ISO 9001:2008 standard and is proud to have attained the ISO 14001: 2015 environmental management standards.

Over the years Dycem has become the therapist's choice for non-slip solutions.

At Home Care

Dycem is particularly helpful for anyone with gripping difficulties but we can all find uses for Dycem around the home...

Sometimes even the smallest of gadgets can be a big help especially if you have arthritic hands. Using Dycem non-slip Jar and Bottle Openers to help is a simple option. The Dycem non-slip material enables jars and bottles to be opened by using less physical effort and therefore reducing the amount of pain caused.

The Openers are not only useful in the kitchen, but also in the bathroom for pill bottles and cleaning materials.

Products shown on these pages are Jar Opener & Pad Sets, Bottle Openers, Coasters, Pads and Roll Material.

Dycem openers were scored 10/10 in best opening gadgets in an independent survey by Yours Magazine.

I am very impressed with the ease at which I can use the bottle opener. I get a lot of pain in my hands and wrists but I found the Dycem non-slip bottle openers easy to use; In fact, I have several different kinds and I found these the easiest to use. They are soft and flexible with superb grip, which allows me to manoeuvre my palm and fingers to the position that suits me.

Mrs G Stephenson, USA

Our Yellow Range

Color contrast is important for many partially sighted people, as it helps to make items easier to see against work surfaces.

Placing a white bowl on a brightly colored Dycem Pad will help make it easier to see as well as making the bowl more stable.

Our yellow range has been developed in conjunction with the RNIB (UK foundation for the blind), www.rnib.org.uk

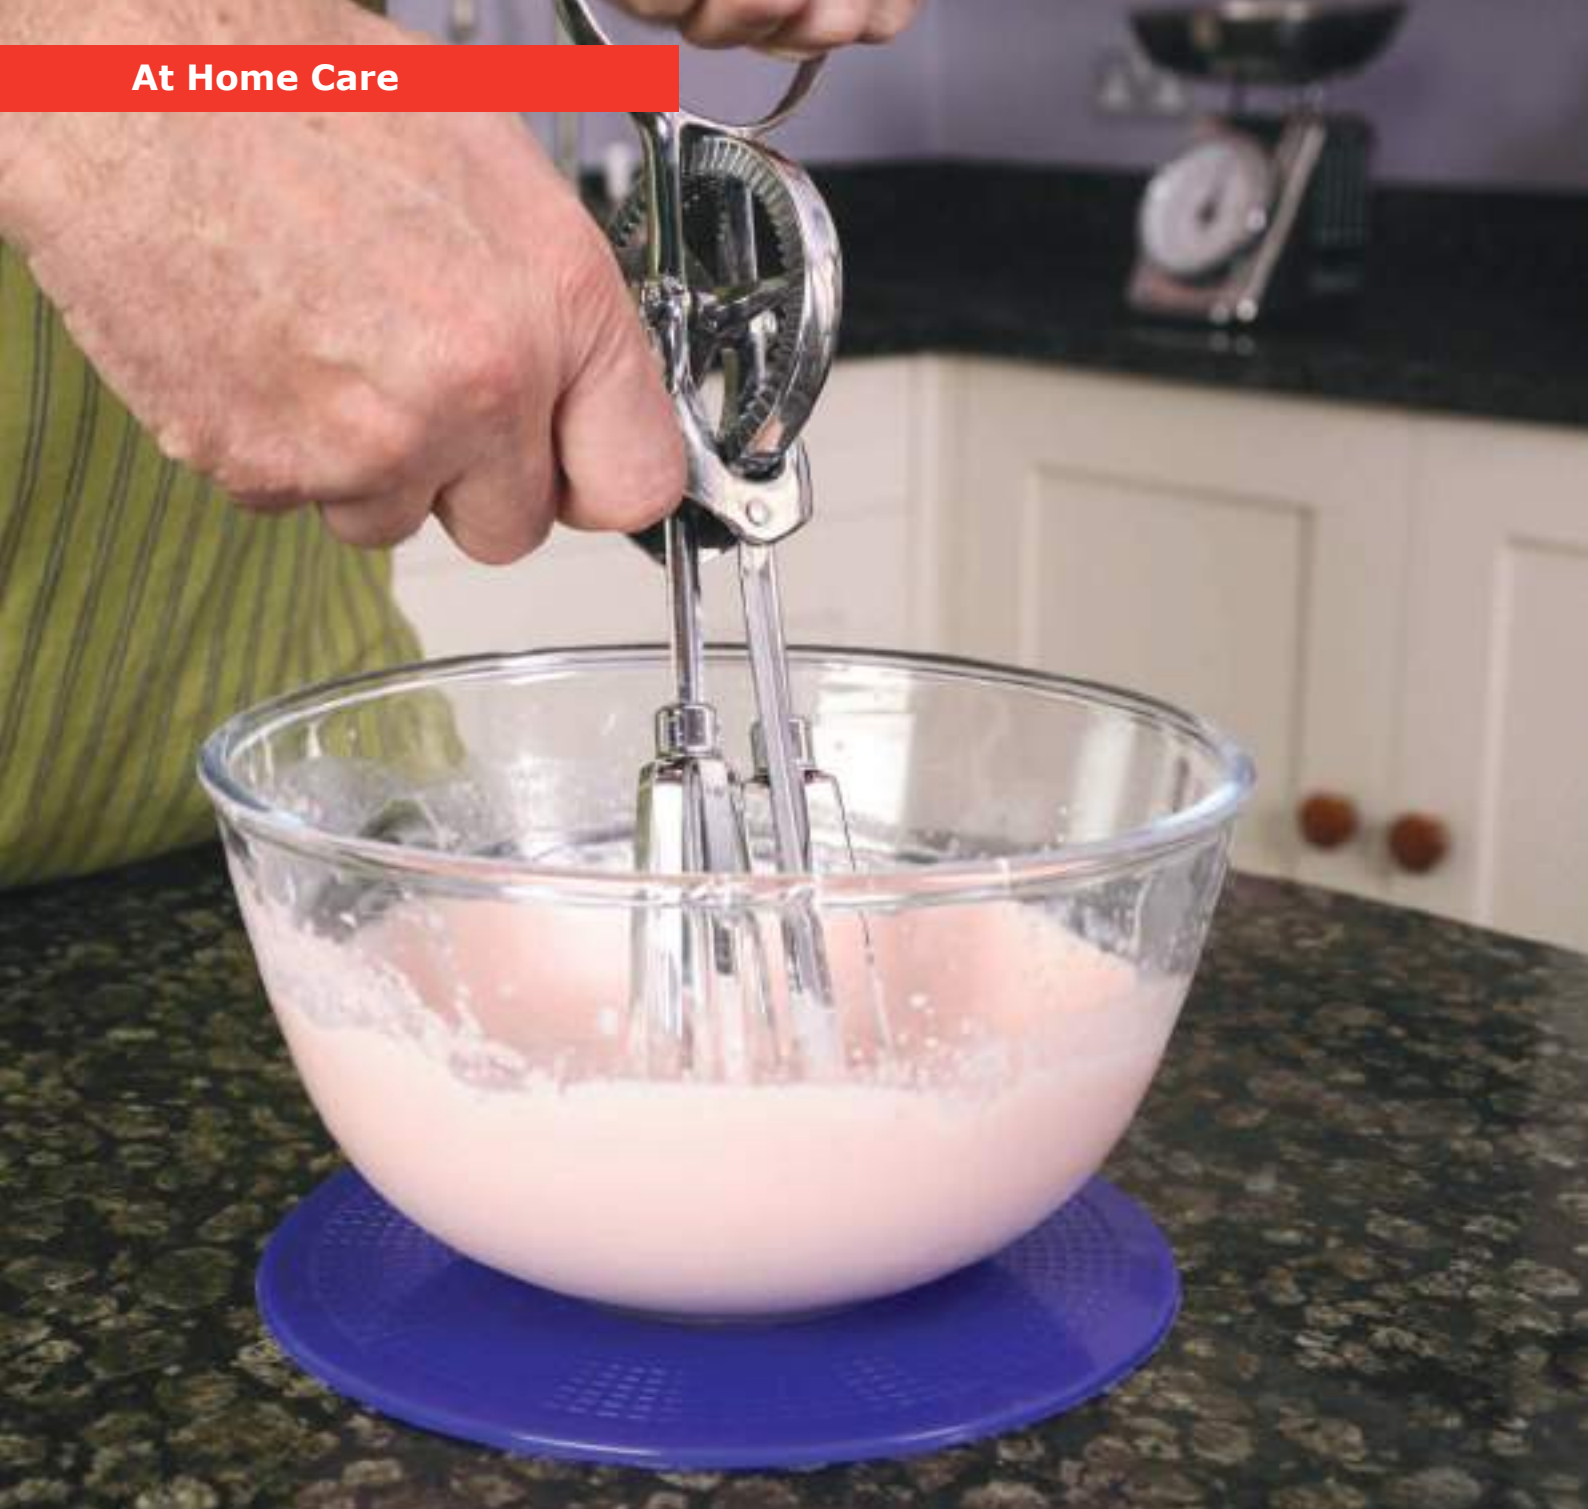

Products shown on these pages are Pads, Strips and Roll Material.

Dycem is the perfect solution to my needs! I am permanently in a wheelchair, and use a tray with a bean-bag type cushion to keep it on my lap. If I don't keep my knees absolutely level, plates of food slide to the floor. With my Dycem, plates and even cutlery stay securely on the tray, no matter how much the tray tilts.

Mervyn Keeble, USA

Dycem non-slip Pads help with a range of eating and dining activities. They are great for use in conjunction with mixing bowls, chopping boards and blenders. Dycem products have built-in antimicrobial silver additive.

Products shown on these pages are Pads.

Seating and Positioning

Dycem Roll material or Netting can be cut to the required size and therefore used discreetly if needed on furniture. There are a variety of color options to either contrast or blend in with the furniture depending on the individual's need.

Both the Roll and Netting can be repositioned and reused, providing a cost effective solution to seating needs.

Using Dycem non-slip Roll material beneath feet and on seats will improve positioning and posture when standing or sitting.

It is also great for use on armrests to help with altered tone and under cushions and pillows to stop sliding.

Products shown on these pages non-slip Rolls cut to size.

“ Being able to sit comfortably is vitally important for social, psychological and physical reasons. Dycem can help in achieving the optimum sitting position. ”

Jen Cave-Ayland,
Occupational Therapist

Products shown on these pages are Self Adhesive Strips, Rolls and Netting.

Fall Prevention

The correct technique when going from sitting to standing or vice versa is crucial when trying to reduce the incidence of falls. Dycem Pads can be placed on the floor by a chair or bed to prompt the correct positioning of the feet.

NEW
PRODUCT

Dycem non-slip Floor Pads provide a surer footing for those who experience weight transference and balance problems, either when pushing up from a seated position or lowering themselves down onto a seat.

Products shown on these pages are Floor Pads, Nose over Toes Pads and Super-Grip Tape.

Physical Therapy

Every physical therapy department can benefit from having stocks of Dycem in their cupboard. Likewise, community therapists should never be without some in their bag. Whatever the caseload or setting, Dycem can help your clients maximize their therapeutic potential and ultimately their independence.

For gait re-education and balance activities, Dycem Roll material and Pads can be used under hands, feet and knees.

Dycem can also stabilize equipment or limbs in weight bearing exercise.

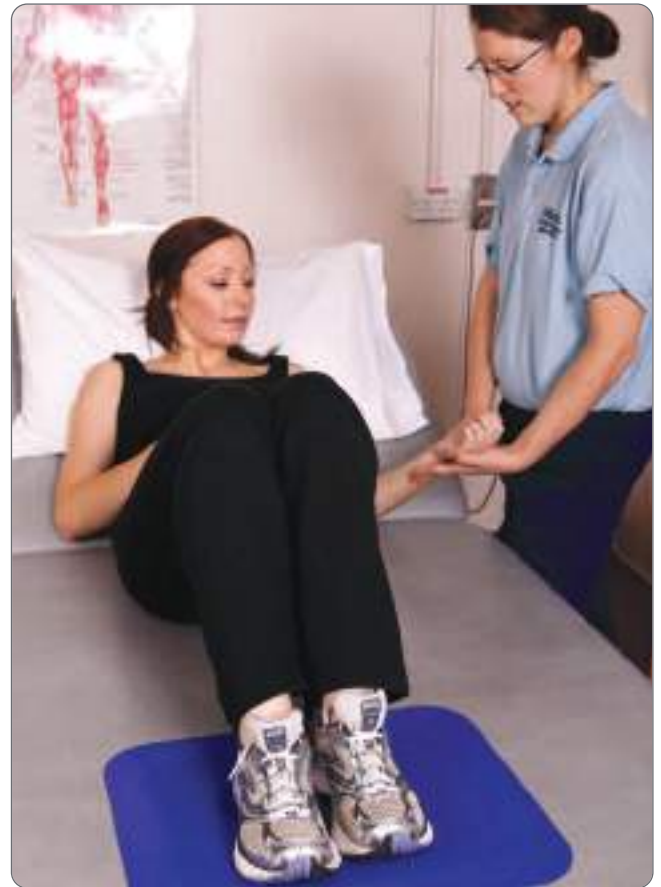

Products shown on these pages are Pads and Rolls.

“ As a Physical Therapist working within the stroke setting I have used Dycem’s non-slip products with great clinical effectiveness.

From dense hemiplegic strokes to mild alterations in an individual’s strength or grip, the Dycem non-slip products have been functional to all my clients. ”

Adam Page, Chartered Physical Therapist

Products shown on these pages are Rolls and Pads.

Dycem Roll material can be cut to size and be placed under pedal exercizers to prevent movement. Dycem Pads can also be used for stability with parallel bar exercise.

Products shown on these pages are Pads, Roll material and Strips.

At Work

Dycem is great in the work environment. It can be used to reduce the physical demands of a job and enable tasks to be completed independently.

Dycem non-slip products can be used at work and school to enable inclusion and maximize independence.

The variety of colors available in the Dycem range means that they can either be used discreetly or as a fun addition to the setting.

Dycem products can be used in a variety of ways including;

- ✓ Securing paper and books while writing
- ✓ Preventing a computer keyboard from moving
- ✓ Wrapping round pens or pencils for a built-up grip

Products shown on these pages are Pads and Rolls.
