Track your B.A.C. – BACTRACK!

**INTRODUCTION**

The **BACTRACK® Select S50 Breathalyzer** is a professional alcohol screening device, used for the detection of alcohol in the breath. The BACTRACK provides a digital result, indicating the approximate BAC (Blood Alcohol Content) of the test subject. The BACTRACK is powered by two AA batteries and is very easy to use. Simply turn on the unit and begin testing your alcohol level in a matter of seconds. However, before you begin testing, there are a few things you should know. Please take a moment to read your owner’s manual in its entirety and familiarize yourself with the BACTRACK.

**Alcohol and Its Effects on the Human Body**

Alcohol is absorbed from the mouth, throat, stomach and intestines into the bloodstream.

Alcohol ingested by the human body can be detected in the breath because of its presence in the bloodstream.

Alcohol cannot be digested, and it cannot be chemically changed in the bloodstream. As the blood flows through the lungs, alcohol in the bloodstream moves across the membranes of the lung’s air sacs (alveoli) into the air. The concentration of the alcohol in the alveolar air is directly related to the concentration of the alcohol in the blood. As the alveolar air is exhaled, the alcohol in it can be detected by the breath alcohol testing device.
The alcohol concentration in the breath is related to that in the blood, and because of this, an individual’s BAC can be determined by measuring alcohol in the breath. The ratio of breath alcohol to blood alcohol is generally estimated to be 2,100:1. Therefore, 2,100 milliliters (ml) of alveolar air will contain approximately the same amount of alcohol as 1 ml of blood.

**Alcohol is a Drug**

Alcohol is the chemical (ethanol or ethyl alcohol) resulting from the fermentation of grapes or grain. Alcohol is absorbed directly into your bloodstream. From your bloodstream, the fluids in your body tissues absorb the alcohol. Your brain is made up of a large concentration of fluids and will absorb a large amount of any alcohol you drink. Your liver eliminates the absorbed alcohol at its own rate of time and nothing you eat or drink can speed up the process. Your liver does this by oxidizing the alcohol (converting it into water and carbon dioxide). Coffee, food or any other “cure” will not sober you up. Only time will do that.

**How does alcohol affect my body?**

Alcohol is a depressant. It has a relaxing effect on the muscles in your body. The muscles of your eyes relax and lose focus. Your eyesight will become fuzzy and you may experience double vision. Brain activity is slowed. Your judgment, reflexes, and coordination are all negatively affected.

Some vision impairments that occur when you have been drinking include:

- Narrowing of your field of vision
- Reduction in your depth perception
- Decreased ability to see in darkness
- Increased sensitivity to glare and a longer time for your eyes to readjust from the glare

Some mental (brain) impairment can occur when you have been drinking, including:

- Reduced awareness of danger
- Becoming overly confident and reckless
- Difficulty in making decisions
- Reduction in balance
- Slowed reflexes
- Impaired judgment

**How does alcohol affect my driving?**

We can’t emphasize enough how dangerous it is for you to drink and drive. Your vision and your brain are the most important factors in driving safely. If you jeopardize either by drinking, and then you drive, you are likely to be involved in a serious or fatal collision.

From California Department of Motor Vehicles (http://www.dmv.ca.gov)
**DOSE-SPECIFIC EFFECTS OF ALCOHOL**

<table>
<thead>
<tr>
<th>BAC</th>
<th>Dose-Specific Effects</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.02-0.03%</td>
<td>Slight euphoria. Loss of shyness. Depres-sant effects are not apparent. Impairment possible in some individuals.</td>
</tr>
<tr>
<td>0.04-0.06%</td>
<td>Feeling of well-being, relaxation, lower inhibitions and sensation of warmth. Euphoria. Some minor impairment of rea-soning and memory. <strong>Lowering of caution. Driving skills may be impaired at this level of intoxication.</strong></td>
</tr>
<tr>
<td>0.07-0.09%</td>
<td>Slight impairment of balance, speech, vi-sion, reaction time, and hearing. Euphoria. Judgment and self-control are reduced. Caution, reason and memory are im-paired. <strong>Driving skills are always impaired at this level of intoxication and higher.</strong></td>
</tr>
<tr>
<td>0.10-0.12%</td>
<td>Significant impairment of motor coordina-tion and loss of good judgment. Speech may be slurred. Balance, vision, reac-tion time and hearing will be impaired. Euphoria.</td>
</tr>
<tr>
<td>0.13-0.15%</td>
<td>Gross motor impairment and lack of physical control. Blurred vision and major loss of balance. Euphoria is reduced and dysphoria (anxiety, restlessness) is begin-ning to appear.</td>
</tr>
<tr>
<td>0.16-0.20%</td>
<td>Dysphoria predominates. Nausea may appear.</td>
</tr>
<tr>
<td>0.25%</td>
<td>Needs assistance in walking. Total mental confu-sion. Dysphoria with nausea and some vomiting.</td>
</tr>
<tr>
<td>0.30%</td>
<td>Loss of consciousness.</td>
</tr>
<tr>
<td>0.40% and up</td>
<td>Onset of coma. Possible death due to respiratory arrest**.</td>
</tr>
</tbody>
</table>

* The effects of alcohol intoxication are greatly influenced by individual variations among users. Some users will be intoxicated at a much lower BAC than shown above.

**Death can occur at a lower BAC in some individuals.

The generally accepted legal standard for alcohol intoxication in the United States is 0.08%. However, your driving skills can be impaired at a level of 0.04% or lower. It is never safe to drink any amount of alcohol and drive.
**PREPARATION**

**Installing the Battery**

Install two AA batteries in the battery compartment. (Batteries are included.)

**OPERATION**

**IMPORTANT!**

Test subjects should wait 20 minutes after eating, drinking, or smoking before blowing into the BACTRACK Breathalyzer. **Failure to wait 20 minutes can provide inaccurate test results and damage the sensor.**

**STEP 1:** Insert a disposable mouthpiece. It is recommended to insert a new mouthpiece before each test.

**STEP 2:** Press the POWER button to turn on the BACTRACK. The total number of tests performed since the last service is briefly displayed and then a countdown sequence begins.
STEP 3: When the countdown approaches 10, begin to inhale a deep breath.

STEP 4: When the countdown reaches zero, the READY light will flash and two beeps will sound. Blow hard, continuously, for five full seconds. While a user is blowing, the BACTRACK will sound a continuous tone. Keep blowing until two beeps are heard.

STEP 5: When finished taking a breath sample, the BACTRACK will circle the outer LCD fields for three seconds while analyzing the breath sample.

STEP 6: Once the sensor technology has analyzed the breath sample, the estimated BAC (Blood Alcohol Content) value is flashed on the screen.

The test result will be displayed for 10 seconds. Then the BACTRACK will beep five times before powering off.

If the BAC reading is over 0.05%, the red WARN lamp will illuminate and a rapid beep alarm will sound.

Understanding BAC Results
The displayed result is an estimate of the test subject’s BAC. A breath alcohol tester cannot determine the exact BAC in the blood of the test subject. Correlation between BrAC and BAC depends on many factors, such as temperature and health conditions. Therefore, only use this device as a tool to screen for the presence of alcohol.

Many people consider a 0.02% or greater a positive test for alcohol in “zero tolerance” screening. Most states have 0.08% as the legal BAC limit for tasks such as operating a motor vehicle. Some states prohibit driving commercial vehicles or any vessel with a 0.04% BAC or higher. Many states and countries prosecute individuals for driving under the influence at any level.

Alerts

Battery Low: The battery power is low. Please replace the batteries.

Flow Error: The breath sample was not sufficient. Please repeat the testing process, ensuring a continuous, 5 second breath sample.

Time Out: If the user does not blow within 10 seconds, the unit displays [Out] and shuts down.

Calibration: The unit requires recalibration or maintenance. Please refer to the Verification and Calibration section of this manual.

**PRECAUTIONS**

1. Wait at least 20 minutes after drinking, eating or smoking before testing. Not observing this waiting period can cause inaccurate readings, damage the sensor, and void your warranty.

2. Do not blow smoke, food, or liquids into the BACTRACK as this will damage the sensor.

3. Do not test in areas with strong winds, smoke, or in an area where a large amount of alcohol is being consumed.

4. Replace the two AA batteries when the screen displays [bat].

5. Send your tester in for periodic calibration service as required. (See calibration).

6. The BACTRACK Breathalyzer is designed to be used in a temperature range of 50-104 °F (10-40 °C). Operation of the unit in temperature ranges above or below this range may affect the accuracy of results.

7. Avoid testing in the presence of any substances that contain methyl alcohol, isopropyl alcohol or acetone. These substances may interfere with the results of the test.

8. Diabetes, a low caloric intake diet, or certain health conditions may cause a false positive test when there is an increased ketone concentration in the breath. Consult with a licensed physician to see if this may apply to you.

9. Do not use the BACTRACK as a tool to determine whether you should operate a motor vehicle or equipment, or perform any other dangerous act.

10. Do not drink and drive. Always have a designated driver when alcohol is being consumed.
The BACTRACK Select S50 Breathalyzer is calibrated during manufacture using advanced alcohol simulation equipment. Known alcohol concentrations are passed through the sensor to set baseline values for testing. During testing, the unit compares users’ breath samples to these baseline values.

The accuracy of breath alcohol testers can fluctuate after six to twelve months of normal use, depending on the number of tests performed and operating conditions.

If this product is providing inconsistent test results, is not providing any test results, or provides unusually high or low test results, the product should be recalibrated by a trained professional.

The product should be recalibrated at least every six to twelve months. If the product is used every day, it may need to be recalibrated as frequently as every month.

Calibration Instructions

Please visit www.bactrack.com or call 877-334-6876 for information on how to get your BACTRACK Breathalyzer recalibrated.

During recalibration, a professional technician will reset the sensor baseline values and also perform a full diagnostic check to ensure the accuracy and reliability of the product.

KHN Solutions’ warranty obligations for this product are limited to the following:

KHN Solutions warrants this product against defects in materials and workmanship under normal use for a period of ONE (1) YEAR from the date of retail purchase by the original end-user purchaser (“Warranty Period”). Except as provided in the preceding sentence or applicable law, KHN Solutions provides this product “as is”. If a defect arises and a valid claim is received by KHN Solutions within the Warranty Period, at its option, KHN Solutions will either (1) repair the product, (2) exchange the product with a product that is new or which has been manufactured from new or serviceable used parts and is at least functionally equivalent to the original product, or (3) refund the purchase price of the product. When a refund is given, the product for which the refund is provided must be returned to KHN Solutions and becomes KHN Solutions’ property. This warranty is limited to the original end-user purchaser and is not transferable to, or enforceable by, any subsequent owner.

Exclusions, Limitations, and Disclaimers

KHN Solutions makes no warranties, express or implied, as to the ability of this product to determine whether, or the extent to which, a test subject’s mental or physical functioning, or judgment, may be impaired by blood alcohol including whether the
test subject is intoxicated under any definition of that word. KHN Solutions expressly disclaims any liability for direct, indirect, incidental, special, or consequential damages of any nature under any legal theory. Any act or failure to act based on a reading from this product shall be at the test subject’s or user’s own risk. KHN Solutions assumes no responsibility for consequences to or of test subjects who use this product and later are shown to have been under the influence of alcohol or to have had their judgment or any mental or bodily function impaired by alcohol.

Correlation between breath alcohol content and blood alcohol concentration depends on many variables, including environmental factors (such as air quality, wind, humidity, temperature, etc.) and health conditions of the test subject. A low BAC reading does not mean that the test subject’s physical or mental performance or judgment (including reaction times) can respond to an emergency. The concentration of alcohol in the blood of a test subject cannot be exactly determined by using a breath alcohol screening product.

KHN Solutions does not warrant that the operation of the product will be error-free. KHN Solutions is not responsible for any consequences arising from failure to follow instructions or relating to the product’s use. This warranty does not apply: (a) to consequences caused by accident, abuse, tampering, misuse, flood, fire, earthquake or other external causes; (b) to consequences caused by operating the product outside the permitted or intended uses described by KHN Solutions; (c) to consequences caused by service performed by anyone who is not a representative of KHN Solutions or a KHN Solutions Authorized Service Provider; or (d) to a product or part that has been modified to alter functionality or capability without the written permission of KHN Solutions.

TO THE EXTENT PERMITTED BY LAW, THIS WARRANTY AND THE REMEDIES SET FORTH ABOVE ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES, REMEDIES AND CONDITIONS, WHETHER ORAL OR WRITTEN, STATUTORY, EXPRESS OR IMPLIED. AS PERMITTED BY APPLICABLE LAW, KHN SOLUTIONS SPECIFICALLY DISCLAIMS ANY AND ALL STATUTORY OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND WARRANTIES AGAINST HIDDEN OR LATENT DEFECTS. IF KHN SOLUTIONS CANNOT LAWFULLY DISCLAIM STATUTORY OR IMPLIED WARRANTIES THEN TO THE EXTENT PERMITTED BY LAW, ALL SUCH WARRANTIES SHALL BE LIMITED IN DURATION TO THE DURATION OF THE EXPRESS WARRANTY AND TO THE REPAIR OR REPLACEMENT SERVICE AS DETERMINED BY KHN SOLUTIONS IN ITS SOLE DISCRETION.

No KHN Solutions reseller, agent, or employee is authorized to make any modification, extension, or addition to this warranty. If any term is held to be illegal or unenforceable, the legality or enforceability of the remaining terms shall not be affected or impaired.
EXCEPT AS PROVIDED IN THIS WARRANTY AND TO THE MAXIMUM EXTENT PERMITTED BY LAW, KHN SOLUTIONS IS NOT RESPONSIBLE FOR DIRECT, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES UNDER ANY LEGAL THEORY, INCLUDING BUT NOT LIMITED TO LOSS OF USE; LOSS OF REVENUE OR INCOME; LOSS OF ACTUAL OR ANTICIPATED PROFITS (INCLUDING LOSS OF PROFITS FROM A CONTRACT); LOSS OF THE USE OF MONEY; LOSS OF ANTICIPATED SAVINGS; LOSS OF BUSINESS; LOSS OF OPPORTUNITY; LOSS OF GOODWILL, OR LOSS OF REPUTATION.

This Breath Alcohol Tester is intended to measure alcohol in human breath. Readings obtained by this device are used in the diagnosis of alcohol intoxication. The accuracy of this device has been established at a Blood Alcohol Concentration of 0.008 and 0.032. Accuracy at a Blood Alcohol Concentration greater than .032 has not been established.

Some countries, states and provinces do not allow the exclusion or limitation of incidental or consequential damages or allow limitations on how long an implied warranty or condition may last, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you may also have other rights that vary by country, state or province. This Limited Warranty is governed by and construed under the laws of the country in which the product purchase took place.

Obtaining Warranty Service

Please be sure to read this instruction manual carefully if you believe your product is not operating properly. If you still feel that your product requires warranty service, please follow these instructions:

Obtain a Return Authorization (RA) number by calling toll-free 877-334-6876 or by emailing service@bactrack.com.

When shipping the product back to KHN Solutions, please package the product carefully and ship using a major carrier (UPS, FedEx, USPS, etc). To ensure proper credit for a returned item, be sure to obtain a delivery confirmation on the return shipment. The customer is responsible for all return shipping charges.

Include the following information with your returned product:

- Your Return Authorization number
- Name, address, and phone number as stated at the time of order
- A copy of your original sales receipt
