

# Cloudy with a Chance of Persistence

*AWS Post Compromise primer by Peter Ewane*

DEFCON - WALL OF SHEEP 2017

# I am Peter therefore I am

- 👽 Security Researcher at AlienVault
- 👽 Cocktail and weird wine aficionado
- 👽 Native Texan
- 👽 @eaterofpumpkin

# Itinerary

- 👾 Intro to AWS
- 👾 Infection Vectors
- 👾 Hiding Techniques
- 👾 Persistence Techniques
- 👾 AWS Hardening Tips

# What is a “AWS”

- 👾 Who is Amazon and what are their web services?
- 👾 Why should you care?

# User Based AWS Compromise Vectors

- 👾 Infected Machines
- 👾 Phishing
- 👾 Credential Leakage
  - BitBucket
  - Github
- 👾 Social Engineering

# Service Based AWS Compromise Vectors

- 👾 3<sup>rd</sup> Party Monitoring Services
- 👾 MetaData Leakage
- 👾 AMI Poisoning
- 👾 Instance Profiles
- 👾 Public EBS Snapshots

# Hiding in AWS

- 👾 CloudTrail Alteration
  - Log Deletion
  - Stopping Logging
- 👾 S3 Trail Storage Alteration
  - Altering the log rotation / retention policy
  - Changing the location of log writes
- 👾 AWS Key Management Service (KMS)
  - Encrypt the log files

# Persistence

- 👾 Creating a New User
  - Typo Squatting
- 👾 Creating Temporary User
- 👾 Creating New User Access Keys
- 👾 Backdoor Existing Roles
- 👾 Backdooring AMIs
- 👾 Modification of Default Security Groups

# Attempting to be More Secure

- Use IAMs instead of the Root Account
- Utilize the Least Privilege Model
- Use Instance Profiles
- Audit Everything
  - AWS CloudTrail
  - AWS Config
  - AWS CloudWatch

# Questions?

- 👁 Ask them if you have them
