CAFÉSMART 2017

We would like to thank our CafeSmart Partners for their efforts in this year's donation drive:

Floral Art, Buderim
White's IGA, Peregian Beach
Urban Deli, Maroochydore

And big thanks to all of our customers who came in and donated on the day!

This year, over 750 cafes participated Australia-wide, and together we raised over \$175,000 to provide support for the homeless. They are still counting the donations!

BOOMERANG BAGS

REDUCE PLASTIC BAG WASTE
CONNECT WITH YOUR COMMUNITY

WHAT ARE BOOMERANG BAGS?

Reusable, handmade shopping bags. They cut down on plastic waste and are far more durable (and washable!) than standard plastic bags. You can use them anywhere you do your shopping like the local supermarket or farmers markets.

WHY IS IT IMPORTANT?

Australians use an estimated 5 billion plastic bags every year, with around 50 million bags ending up in our waterways and a majority of the rest going to landfill.

As of July 2018, plastic disposable bags, and certain other types of single-use plastic packaging, will be banned. This means that now is the perfect time to start preparing to make the switch to reusable products.

HOW DOES IT WORK?

Various community organisations and businesses are putting groups together to both make and distribute Boomerang Bags. As a customer, you can opt to take your purchases home in a free Boomerang Bag by going to any store that offers them.

As a producer, you can donate your time and resources so that there are enough bags to go around. Then your community doesn't need to rely on plastics for their shopping.

Step 1: CONNECT

Step 2: COLLECT MATERIALS

Step 3: MAKE BAGS

Step 4: PUT THEM TO USE

Go to www.boomerangbags.org for info & to get involved

5 WAYS TO USE YOUR OLD COFFEE GRINDS

IN THE GARDEN

If you have roses, azaleas, hydrangeas or rhododendrons, you can mix old coffee grounds with a little leaf litter or straw and put straight over your plants as an excellent fertilizer. The change in PH can help make your hydrangeas more blue. For other plants that aren't so happy with acidity, add the grinds to your compost for use later. Carrots & radishes love coffee!

IN THE KITCHEN

Used coffee grinds are an excellent deodorizer. If you want to get rid of a stubborn smell from a plastic container, add a little water to some coffee grinds and leave for a few hours. Scrub/rinse away and the smell should be gone. You can also place an open container of old grinds in your fridge, freezer or pantry and it will help remove any stale odours. Scrub into your hands after chopping onion and garlic to remove the smell.

ON YOUR SKIN

Make your own potent body scrub with grinds, your choice of yummy oil, like coconut or olive oil, and scrub away! You can even add honey and some essential oil to boost the spa experience. Perfect for silky smooth hands and feet, and the caffeine is purported to fight cellulite! Be warned, though, it can make a bit of a mess so be prepared to rinse out your shower thoroughly afterwards.

FOR CLEANING

Coffee grinds can help you scrub out stubborn deposits on the driveway, in your fireplace and your oven. Mix grinds with a bit of water and your chosen detergent to clean burnt pots & pans, and wipe away once you're finished scrubbing. This also works on baking trays and pots (avoid non-stick and stoneware surfaces).

GET CRAFTY

Coffee grinds can be used to make a golden dye for clothing and papermaking. Make your own scented candles using recycled candle wax and fresh wick. Make an air freshener for your car using dry grinds and old stockings... the possibilities are limited only by your ingenuity!

IN STOCK: COFFEE MACHINES

We have quality machines designed to make commercial-level espresso at home.

Each machine comes with full training to ensure you make the best coffee from the start. We also offer packages to get you set up with all the accessories you need to make professional-quality drinks at home.

With proper care and maintenance, you can expect to get more than 10 years out your investment.

Come in and see us at the roastery for info on the different options we have available.
