

DRINKING WATER SYSTEMS FOR ACTION SPORTS AND ADVENTURE

Spigot:

A compact, lightweight system for filtering and purifying drinking water right where the action is. No single use bottles, no chemicals.

Super easy to use, just connect to a water source and switch on.

The Guzzle Filter is a two stage system that filters and purifies your drinking water.

Stage 1 is a Carbon Block Filtration process that absorbs chlorine, chemicals, and contaminants.

Stage 1 leaves your water tasting great!

Stage 2 is an LED Ultraviolet C Purification process that inactivates at least 99.99% of bacteria, protozoa, and viruses.

Stage 2 makes sure your water safe to drink!

The Guzzle Filter is everything you need to allow your team, family, or crew to conveniently be free of water in plastic disposable containers.

Good for the Planet One life cycle of the carbon block filter cartridge can save up to 700 lbs of plastic compared to consuming bottled water!

A Time and Money Saver No more purchasing and hauling bottled water on adventures! Conveniently use available water sources. Costs less than bottled water in the long run!

Quenches Your Thirst Provides great tasting and safe drinking water!

DRINKING WATER SYSTEMS FOR ACTION SPORTS AND ADVENTURE

specifications:

- Max Flow Rate 1.1 gallons (4L) / min
- 116 Max PSI
