

# Quick Start Guide

## Installation Instructions

**STEP 1**  
Deflate tire & remove valve core with included tool

**STEP 2a (Pouch Dispensing Cap)**  
Attach cap to pouch. Push hose over valve stem. Flip open stem of cap. Squeeze contents of pouch into tire

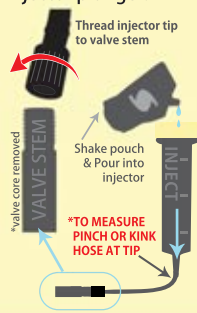

**STEP 3**  
Re-install valve core

Inflate tire, drive slowly or rotate for several minutes

**STEP 2b (Injector)**  
Attach injector to valve stem and pour into injector body, funnel/inject sealant into valve stem with injector plunger.

Add the red TireJect valve cap to mark tire

\*Use cold water to clean up

### **i** Troubleshooting steps

If tire deflates add an additional 2oz of TireJect™ Tire Sealant and repeat steps above. For additional troubleshooting tips visit [tireject.com/help](http://tireject.com/help).
