

Project and Annotate with Stylish Frameless Look

For a slim and sophisticated modern look the Educate Projection Edge Whiteboard ticks all the boxes. If you have a standard whiteboard in your classroom or meeting room and use it as a projector screen, it's time to upgrade to a modern alternative. Projection porcelain are manufactured from a vitreous enamel steel surface that offers 60% less sheen than a traditional porcelain whiteboard. The surface goes through a special manufacturing process that incorporates a mica embossed top layer.

The L frame design provides a frameless appearance that compliments any modern decor.

FEATURES

- Sophisticated satin silver edgeless ultra slim frame to offer a sleek modern look to any classroom, boardroom or meeting room
- Wide angle screen available in various sizes - boards can be easily mounted side by side for a seamless look
