## ORMAGEL TEST RESULTS

Much investigation has been performed in Brazil using Ormagel SH directly to treat various skin conditions. In a number of cases the results have been most promising as shown in the accompanying photographs.

Picture #1 - Calloused skin on elbow - initial

Picture #2 - Same elbow after 30 days with daily massages using Ormagel SH

Picture #3 - Calloused skin on toe - initial

Picture #4 - Same toe area after 30 days with daily massages using Ormagel SH.

Picture #5 - Aging skin on leg.

Picture #6 - Same skin area after 10 days with daily massages using Ormagel SH.

In addition, some applications were performed on clients in salons specializing in the treatment of extraordinary skin conditions. Two such results are reported as follows:

Pure, undiluted, Ormagel XPU was applied to the skin of the face of two selected patients, M and I, women 46 years old, for 8 weeks, with 3 weekly sessions in a professional esthetic salon. On the other days of the period patients used the same extract, under the same conditions, in the morning and at night, as a home treatment.

Patient M had been using commercial cosmetics upon her skin since the age of 32.

Patient I had never used commercial cosmetics.

Both patients' skin were examined by nine professional estheticists with the following results:

Patient M - Skin exhibited senile atrophy compatible with age, deep lines in mouth region, expression marks, wrinkles around eyes and lips. Skin was slightly atonic with voluminous eye pouches.

Patient I - Exhibited strong degenerative atrophy, incompatible with patient's age. Her skin was reticulated, coarse, flacid, lusterless, deeply etched in front and around the eyes and mouth.

Both patients were then submitted to professional esthetic treatment according to the following routine.

Salon Treatment

Skin cleaning with demineralized water.
Application of gellified seaweed extract, followed by massagine for 20 minutes.
Application of ozonized steam for 10 minutes.
Rinsing with demineralized water.
Use of galvanic current equipment (2 m Amp) with needle electrode (+ pole) along etchings and skin marks for 10 minutes.
Cleaning with demineralized water.
Application of thin layer of seaweed's gelified extract.

Domestic post-treatment maintenance

After 8 weeks (24 sessions) of salon treatment with gellified seaweed extract, patients were given an adequate sample of o/w cream for daily use, containing seaweed extract plus vitamin E and collagen.
