- Gentle yet Effective Exfoliation
- Botanical
- Stable
- Sustainable
- Many Sizes and Colors

*Your formula's success requires stable, dependable beads. Floratech has made biodegradable, stable Florabeads since the 1980s.*

## Florabeads Jojoba

Biodegradable Florabeads Jojoba provide gentle yet effective exfoliation. Florabeads Jojoba are hard, smooth botanically derived microspheres of jojoba esters. Jojoba esters originate from jojoba, a plant native to the Sonoran Desert, and are well-known for their moisturizing properties.

Florabeads Jojoba are the exfoliative of choice in leading facial scrubs, body polishers and soaps, and are globally approved for cosmetic formulations. The International Dermal Institute does not recommend using crushed fruit pits, shells or similar damaging materials,<sup>2</sup> making smooth, spherical Florabeads the better choice than these other natural exfoliants.

Florabeads Jojoba contain no microplastics and are not restricted by any microplastics legislation. Florabeads Jojoba are available in multiple particle size ranges in all standard Floratech colors. Custom colors and sizes are available upon request.

Gentle

(100x)

Florabeads Jojoba are an effective exfoliant and are mild on the skin.
