

# DogTag

## Collar Mount for Apple AirTag

Harness the power of Apple's AirTag location tracker to keep your pet safe and sound. Internal safety enclosure reduces risk of accidental battery ingestion, and an all weather silicone cover fits most standard collars.

### Compatibility

Designed for 25mm-35mm collars.

### Includes

- 1x DogTag
- 2x zip-ties
- Instructions & screw driver

Designed for 25-35mm collars.

Secures the AirTag battery.

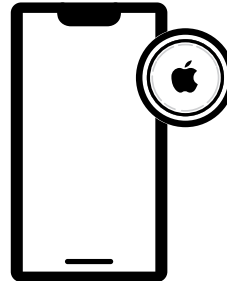

Keeps your AirTag out of the elements.

## Installation

1

### Set up.

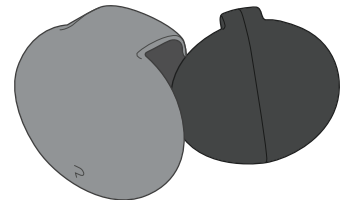

To prepare for assembly, pair an AirTag to your preferred account before continuing.

2

### Disassembly.

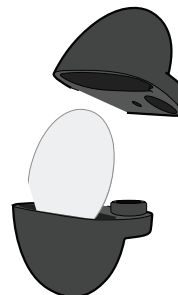

Remove the enclosure from the silicone cover. Use the included screw driver, separate the enclosure. Make sure to keep all the parts close.

3

### Install.

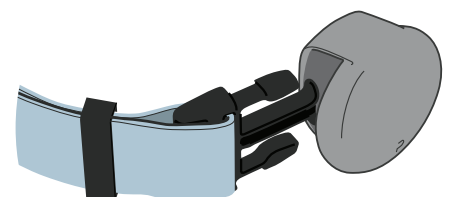

Once pairing is complete, fit the Airtag into the enclosure, and refasten the screw to secure it.

4

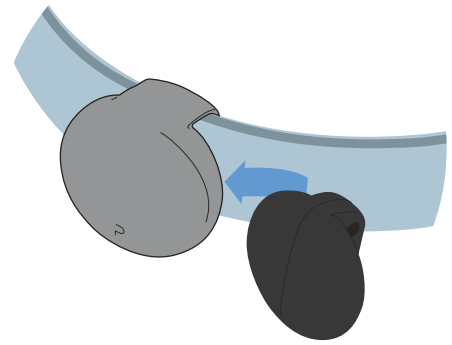

### Collar.

Fit the silicone cover over the collar or harness. Keeping the enclosure out will make this process easier for wider collars.

**5 Plug it in.**

When the cover is in place, fit the AirTag enclosure back inside the cover.

**That's it!**

You're all done!

If you require a more permanent installation, the enclosure features two mounting holes for cord or Zip-Ties to be threaded through.

Reverse these installation steps when you need to access the AirTag battery.

Check your dogtag frequently to ensure it hasn't loosened as this may pose a choking hazard.
