**The Aquasmart® Shower Purifier - a healthy choice**

It's no secret that much of our water supply comes from heavily polluted waters. These sources require chlorination to kill bacteria. High chlorine levels are not healthy for human consumption. The gaseous compounds, including chloroform, are discharged when you shower. Trihalomethanes (THMs) it's absorbed directly through your skin and by inhaling them. Do you suffer from Asthma's? If you care about the food you eat and the water you drink, you should care about the quality of the water you bathe in. Would you drink or bathe in bleach? Chlorine is bleach that eliminates organic matter. Imagine what it can do to your skin, hair, eyes or lungs? Our skin is the biggest organ we have, it absorbs like a sponge. The Aquasmart® Shower Purifier eliminates chlorine and most heavy metals from your shower water, bacteria, controls algae and THMs.

Treat yourself to a natural shower with the Aquasmart® Shower purifier and enjoy these benefits:

- \* healthy skin, healthy body;
- \* softer, silkier, more manageable hair;
- \* reduction in dry, frizzy, or brittle hair;
- \* less itching and flaking of skin and scalp;
- \* less irritation to eyes;
- \* smoother, softer skin;
- \* soaps and shampoos with a richer lather;
- \* protects expensive hair colors;
- \* controls mould, and algae;

Shower filters are recommended by Canadian Cancer society

The Aquasmart® Shower Purifier is the perfect complement to a healthy, active lifestyle. It helps restore vitality to skin and hair and contributes to a sense of well being.

**KDF®55** turns chlorine and other harmful contaminants into harmless compound.

**KDF®55** works best in warm or hot water, unlike other water filters.

Our shower purifier does not reduce your water pressure.

**Replacement Unit**

Assuming average water conditions and particulate levels, the shower filter will provide for an average chlorine reduction of 98 % for 10, 000 gallons at a flow rate of 2.5 g.p.m. Based on these criteria the life expectancy of the shower is 8-12 months, or when the water flow from the shower head is reduced.

Please note that the longevity of the filter depends on original quality of water, amount of showers taken daily and duration of each shower.

**Specifications**

Weight.....	700 grams
Maximum water pressure.....	100 PSI
Minimum water pressure.....	40 PSI
Maximum temperature.....	104 F
