

**Item # 3 Stage Counter Top (Point of Use) and Under The Counter Water Purification Micro Filtration System**

This system is great for municipality, well, or lake water supply. Aquasmart Technologies will customize all systems. **Most importantly is the #1017 Ceramic Alkaline filter, which bring the pH higher for better health.**

These are some of the recommendation and the order of the filter that should be installed:

Stage 1: Water in, Item #251 KDF & GAC for heavy metals, bacteria, chlorine, THM's bad taste and odours. To be replaced every 9-12 months.

Or: Item #1112 stage 1; for chloramines, to be replaced every 9-12 months heavy metals, bacteria, bad taste and odours, middle filter item and #1017 Alkaline filter, and #301 last filter, water out

Stage 2: Middle filter item #1017 a Ceramic Alkaline filter which brings the pH higher for better health, to be replaced every 9-12 months.

Stage 3: Third filter water out from the system, item #301 a 0.5 micron carbon block, removes water born parasites such as Giardia, Cryptosporidium, lead, bad taste and odours. To be replaced every 4-6 months, or when the water flow is reduced.

Or: #1014 Activated Alumina filter #1 to be replaced every 4-6 months, to remove Fluoride, second filter #251 or #1112 and item #301, water out.

The filter replacement recommendation is based on water quality, and how much water is used daily.

Point of use, water supply on demand, for all drinking and cooking water, preparing food, pets and plants, great for apartment, condos, home living or moving often, just detach from faucet and pack it along with you, or easily installed under the sink.

Easy to install, just screw the diverter valve onto your existing faucet, or under the sink, in the shut off valve with a T. Includes all filters. All hardware, Long reach stainless faucet, wrench.

Bottle water has been tested, and proven to be the same quality as tap water. Make the investment once; it will be yours for long, long time.
