

Item # 3Stage Counter Top (Point of Use) and Under The Counter Water Purification Micro Filtration System

This system is great for municipality, well, or lake water supply. Aquasmart Technologies will customize all systems. These are some of the recommendation and the order the filter should be installed:

Stage 1: Water into the system from faucet item #1012 granulated activated carbon, for sediment, particles, trihalomethanes, chlorine, bad taste and odors. To be replaced every 4-6 months. Stage 2: Middle filter Item #251 KDF & GAC for heavy metals, bacteria, chlorine, bad taste and odors. To be replaced every 9-12 months.

Stage 3: Third filter item #301 a 0.5 micron carbon block. Removes water born parasites like Giardia, Cryptosporidium, lead, bad taste and odors. To be replaced every 4-6 months, or when the water flow is reduced. Or these combinations:

Item #251, middle #1014 Activated Alumina filter to be replaced every 4-6 months, to remove Fluoride, and item #301, or: Item #251, middle filter item #1017 an Ceramic Alkaline filter to be replaced every 9-12 months to bring the pH level higher for better health, and item #301.

Item #1112 for chlorine, chloramines, to be replaced every 9-12 months heavy metals, bacteria, bad taste and odors, middle filter item and #1017 Alkaline filter, and #301 last filter. There are other series available.
