

## ALKALINE WATER FOR BETTER HEALTH

The only filtration in the world, today, that will reduce acidity in the body and it will produce natural calcium, magnesium, sodium and potassium ions that can be absorbed 100% in the human body.

**Prevents Reproduction of Germs and Virus**

**Produces large quantities of hydrogen and oxygen**

**Produces higher pH from 6.5 up to 9.88**

**Reverses aging, due to reduction of acid wastes**

**Provides more energy and increases the metabolic process**

**Aquasmart Technologies Inc. offers the best Ceramic Alkaline filter, natural minerals are slowly released into the water, raising the pH level and staying high constantly.**

Essential Minerals are vital to our organs. These are the symptoms when lacking of essential minerals: Fatigue, Insomnia, Loss of Hair, Depression, Diabetes, High Blood Pressure, Asthma, Decayed Teeth, PMS. Migraines, Heart Disease and even Cancer.

\*\*\* **The Aquasmart® Ceramic Alkaline filter** changes the acidic R.O. water into a perfect Natural Alkali Calcium Ionized Water. **The Aquasmart® Ceramic Alkaline filter** simply gives back minerals such as ionized calcium, magnesium, sodium, potassium ion, which were taken away while purifying the water, or having the regular tap water with low pH.

\* **Drinking alkaline water** helps the body dissolve wastes and makes it easier to dispose of them safely.

\*\*\* **The Aquasmart® In-Line Ceramic Alkaline Filter** can be used with: Natural Water, Hard Water, Filtered Water, Distilled Water, Ionized Water, Reverse Osmosis Water. Please ensure to use pre filters before the Alkaline Ceramic filter and you will enjoy high pH water for better health. The Aquasmart® Ceramic Alkaline filter is effective and affordable.

**We believe Aquasmart® Ceramic Alkaline filter to be better choice than water ionizer.** When you compare with the ionizers the results are relatively acid free and depending upon the alkaline mineral content of the tap water and the setting of the ionizer, the pH value of the alkaline water can range from 8.5 to 10.5. However there are several disadvantages to water ionizers. First of all is very high price. Second is the waiting period of one minute before drinking. Third, the ionizers don't have pre-filters, in order to remove contaminants out of water. Fourth, the alkalinity won't remain at the same high pH value. It gradually goes back to the pH value the same as the tap water. The last but not the least disadvantage is the main reason that these machines are so expensive is that most of these companies that sell the ionizers are multi-level. The Alkaline Ceramic filters are to be replaced every 12 months.

These two Ceramic Alkaline filters can be added on to any other existing water purification system.

Item #1016 In-Line Ceramic Alkaline Filter for Any Reverse Osmosis systems.

Item #1017-10" filter standard Ceramic Alkaline ceramic for any micro filtration system.

\*\*\***REVIVE, RESTORE, ENERGIZE, HYDRATE, DETOXYFY, ALKALIZE.**
