

Kanguru Introduces 11-Target Hard Drive Duplicator Offering Exceptional Value

Millis MA – March 4, 2015 - Kanguru unveils an easy-to-use, high-capacity, hard drive duplicator that offers an ideal solution for fulfilling the IT requirements and drive cloning needs of organizations everywhere.

Many organizations rely on the high-quality and reliability of Kanguru's line of duplicators and the KanguruClone™ Brand. The new [KanguruClone 11-Target Hard Drive Duplicator Tower](#) is no exception. This large-capacity, standalone hard drive duplication system delivers all of the same well-recognized, high-end features that Kanguru duplicators are known for, at an affordable price. With the 11-Target HD duplicator, organizations can clone up to 11 hard drives simultaneously, and natively copy 3.5" SATA HDDs with transfer speeds up to 6 gigabytes per minute. 2.5" SATA HDDs and SSDs can also be duplicated with additional adapters.

The stand-alone, KanguruClone 11 HD Duplicator Tower offers exceptional value, towering above all other leading hard drive duplicator brands with key features like:

- **Multiple Copy Modes:**
 - **FULL** - Copies every sector on the source disk
 - **BRIEF** – Copies only sectors that contain data, skipping blank sectors
 - **RESIZE** – Copies from a smaller capacity Source to larger capacity Target
- **Fast Duplication Speeds** up to 6GB/min
- **Secure Wipe** erases data beyond recovery, capable of overwriting user data up to 999x
- **Tray-less, Non-Scratch SATA Connectors** guarantees maximum lifespan
- **HPA and DCO support**
- **Compact size** 16.5" x 7" x 18.5" weighing only 25 lbs.
- **Size and Brand Independent** Copies various capacities and brands
- **TAA Compliant** (Assembled in U.S.A.)

The KanguruClone 11HD Duplicator Tower is available now and can be purchased directly at kanguru.com, or from any one of their authorized Kanguru channel partners, and is priced around \$1999.95.
