Kanguru Remote Management

for Kanguru Defender Secure USB Drives

Manage & Customize all Your Secure USB Drives From One Convenient Console

Kanguru Remote Management Console™ (KRMC)™ is a powerful security application designed for remotely managing Kanguru Defender USB storage devices. This robust software tool simplifies the administration of an organization's fleet of flash drives and Kanguru Defender HDD/SSD devices. A security officer or administrator can customize, enforce, verify, and audit security policies from a central enterprise server or web interface anywhere in the world. The Console stores no data, which is maintained on the encrypted devices.

A Kanguru drive configured with KRMC will automatically connect to a remote server when plugged in. The drive checks for pending actions, messages and software updates even before the user logs in. KRMC also allows an administrator to quickly locate a particular drive anywhere and make policy updates, delete lost or stolen drives, and more. This powerful tool helps organizations comply with data security regulations, significantly reducing the risk of a sensitive data breach.

- **Customize Security Settings for All Secure USB Drives Configured With Your Organization:**
  - Specify Password Complexity & Attempts
  - Manage Enable/Disable Settings
  - Restrict Online/Offline Access
  - Schedule Actions
  - Set Master Policies
- **Communications Secured by the FIPS 140-2 Validated OpenSSL FIPS Object Module**
- **Simple and Easy to Use**

Kanguru Remote Management

for Kanguru Defender Secure USB Drives

REMOTE MANAGEMENT KRMC™

KRMC Cloud Edition™ (Part #: KRMC-CLOUD-xx)

The Kanguru Remote Management Console™ (KRMC™) Cloud Edition is a cloud-based, management service hosted on a secure, enterprise-level, international web hosting platform. Available in a convenient one-year subscription.

KRMC Cloud Pro Edition™ (Part #: KRMC-CLOUD-PRO-xx)

This Cloud-based service is an upgrade to an existing KRMC Cloud subscription and enables an organization to assign multiple administrators under one super-administrator. Assign sub-administrators specific tasks, restrict permissions and privileges depending on the type of access needed.

KRMC Enterprise Edition™ (Part #: KRMC-ENTxx)

Kanguru Remote Management Console™ (KRMC™) Enterprise is a secure, self-hosted system. An add-on module for USB Endpoint Security is also available.

KLA™ Configuration Software (Part #: KDA-BSC-xx)

With Kanguru Local Administrator (KLA), Administrators can configure and customize a wide variety of security and functionality features before and after distributing devices to employees and staff, which will greatly simplify end-user setup and assure all devices are in line with company policy.

Key Features:

- **Customize Security Settings for All Secure USB Drives**
  - Specify Password Complexity & Attempts
  - Manage Enable/Disable Settings
  - Restrict Online/Offline Access (IP & Domain Control)
  - Schedule Actions (Present or Future Times)
