

Kanguru Launches Microsoft-Certified, Windows To Go for a Complete OS Desktop on a Fast USB 3.0 Flash Drive

Millis MA – April 23, 2015 – Kanguru has released a new USB flash drive that's sure to turn heads. The new [Kanguru Mobile WorkSpace™](#) Windows to Go* enables staff to carry and boot up their entire personal desktop from a SuperSpeed USB 3.0 flash drive with the ability to work on any PC of choice, anywhere they go.

With organizations finding BYOD (Bring Your Own Device) a great alternative to large scale purchases and expensive equipment, IT administrators and staff alike will discover this useful USB device as a very handy tool.

Some of the great features of the Kanguru Mobile WorkSpace are:

- Certified by Microsoft Windows To Go
- Simple and Easy to Use
- Ability to Easily Deploy a Company's Golden Image
- Can Be Provisioned Using Microsoft System Center
- IT Administrators Can Rapidly Deploy with Policies Intact
- Perfect for Business Travel, Disaster Preparedness, Contractors, etc.
- BitLocker Encryption Ready (FIPS 140-2 Validated)
- Bypasses Host OS in a Secure Environment
- 64GB Storage Capacity
- Configured as a Fixed Drive
- TAA Compliant

Convenient Windows To Go Environment

The Kanguru Mobile WorkSpace is extremely convenient for travelers and mobile users who often work offsite. Staff, Contractors and even emergency workers can carry their own Windows 7, 8, or 8.1 OS anywhere on the convenient flash drive and boot into their Windows desktop on any PC, with full functionality and all of their desktop assets available on the fly.

Rapid IT Deployment

IT administrators can rapidly and easily deploy Windows To Go desktops for employees, ensuring company policies, procedures, and requirements are met without having to configure individual machines. This can reduce set-up time tremendously.

BitLocker Security

Additionally, the Kanguru Mobile WorkSpace is BitLocker Ready, meaning that the flash drive has the option to enable full disk encryption via BitLocker. This supports FIPS 140-2 Validation, adding convenience and protection to the flash drive.

Customization

Kanguru also offers full customization and engraving options for USB drives as a handy way to customize or

personalize important data on the flash drive. Organizations may want to include a company logo, provide serial numbers to track devices, or perhaps add a phone number to call if the device is ever lost.

The Kanguru Mobile WorkSpace Windows To Go flash drive can be purchased directly at kanguru.com, or from any one of their authorized Kanguru channel partners, for around \$119.95.

Kanguru is a global leader in providing high-quality hardware encrypted secure USB flash drives, hard drives, solid state drives, portable USB storage devices, remote management applications, duplication equipment and more. Kanguru is committed to offering the highest level of quality secure products and services to enterprise, government, healthcare, organizations and consumers world-wide with easy-to-use, certified IT products and data storage.
