

## Kanguru FIPS 140-2 Certified, Encrypted SSD Provides Robust Data Security for High-Security Organizations

Millis, MA, USA – April 18, 2018 – The Kanguru Defender® Family of External Encrypted Data Storage Devices provide robust data security and flexibility for security-conscious organizations, and the **Kanguru Defender Solid State Drive** is no exception. With its FIPS 140-2 Certification, TAA Compliance, and AES 256-bit hardware encryption, the **Kanguru Defender SSD300™** is perfect for government, healthcare, Financial, Enterprise and other high security organizations seeking to secure sensitive data on high-quality devices using solid state technology.

*“The FIPS Certified Defender SSD300 provides data protection at its best,”* says Don Brown, President and CEO of Kanguru, *“With robust solid state drive technology, 256-Bit hardware encryption, and FIPS 140-2 Certification, it is the best SSD available on the market for securing and protecting data.”*

As a USB external Solid State Drive, the energy-efficient **Kanguru Defender SSD300™** provides top-of-the-line, USB 3.0 solid state technology and speed for fast data transfers with no moving parts, for quieter, faster data storage. For encryption, you can't beat the **Defender SSD300**, built to NIST's highest government standards and guidelines to help organizations meet and exceed even the toughest security policies:

- **FIPS 140-2 Certification**
- **AES 256-Bit Hardware Encryption (XTS Mode)**
- **Fully-Integrated Remote Management Ready With KRMC™**
- **On-Board Anti-Virus Protection**
- **TAA Compliant**
- **Meets Compliance Standards (HIPAA, GLBA, SOX, etc.)**

The drive is available in generous storage capacities of 256GB, 480GB, and 1TS.

For more information on purchasing the **Kanguru Defender SSD300™**, visit [www.kanguru.com](http://www.kanguru.com), or if you have any questions regarding other fine Kanguru security products and how they can help your organization, feel free to contact the Kanguru Sales Team at **1-888-KANGURU** (1-888-526-4878).

*Kanguru is a global leader in manufacturing high-security storage products, providing the best in FIPS 140-2 and Common Criteria Certified, hardware encrypted, Defender® secure USB drives and fully-integrated remote management security applications. Kanguru also manufactures duplicators for Blu-Ray, DVD, Hard Drives, SSDs and more, along with high-speed flash drives, optical drives, and solid state drives.
