- Deduct £10/mt for delivery in tote bags. Prices are based on 1mt per pallet. Minimum order quantity for totes is 1mt and multiples of tonnes thereafter.
- All mixes are quoted delivered mainland UK and include a non return pallet. Bag size 20 Kg. **Quantity discounts - please enquire.**
- Prices stated are based on the current wholesale values and could be, without notice, subject to change according to market forces.

**Notes on Seed quality:** Our supplier operates to accepted UK and European feed industry standards when sourcing all raw materials. These standards amongst other things control the moisture, admixture, purity and condition of the grains that are handled so our supplier is more than confident that the products are free of contaminants In this case weed seeds. The raw materials used are subjected to further cleaning and refining in the manufacturing processes. Our supplier is currently certified under the FEMAS, UFAS and TASCC quality schemes.

# Well Fed Birds...what our clients say

**Cotswold Grass Seeds Direct are happy to recommend Well Fed Bird's Hungry Gap Mixes.**

Growing bird seed mixes together with supplementary feeding over the winter 'hungry gap' (Jan-Apr) is arguably **the best way to support farmland birds** during the colder months, providing a regular, constant source of food. Well Fed Bird's Hungry Gap mixtures are **highly recommended. John and the team are friendly and helpful, and their service is quick and efficient.**

Dear John

Just to say that we are **delighted with your service, and seed we have bought from you over the last few years.** Because we need to buy large quantities for our winter bird feeding commitment on the farm, it has been great to have someone to give us **expert advice on the best mixes, and bag sizes for our needs.**

**The birds seem very happy about the service too!**  
Best wishes, Henry Jones, F W Jones & Son, Shropshire

Dear John

I would recommend using Well Fed Birds mix. Our HLS project advisor was **happy with the choice of mixes.** The feed comes in **easy to manage bags.** There is only one invoice to show if necessary. I am always far busier than I anticipate with the cattle in December and having done the sourcing of individual seeds and liaised with the project officer to the correct mix I sometimes start feeding later than anticipated... **Well Fed Birds mix saves me a lot of time and energy, and makes this job much easier.**

Bird population has gone up noticeably since starting supplementary feeding, Well Fed Bird's different mixes target what is needed. I feel I have saved time, energy and money buying Well Fed Bird mixes, I find buying in bulk from one supplier simplifies keeping the records that the scheme requires.

**Andrew Jones, beef and arable farmer, Wiltshire**
