

CHALCEDONY OF WEALTH

When I use the term "wealth" I am referring to your state of health & vitality, not financial wealth. Finances are earthly, man-made constructs that have unfortunately created an illusion of lack and poverty for too many people, leading them to believe they do not have enough and therefore they must not be enough.

The Divine Truth is, you ARE already abundant. Abundance and wealth are states of presence and perspective. The more you live your life through the lens that you are MORE than enough and you have all you need to be happy because you ARE Divine, the more great opportunities for growth and prosperity you will attract.

Like attracts like.

May this design inspire you to emit the most radiant energy you can channel as often as you can and you'll be amazed at how quickly your life will transform.

*Peace & Love

MAD GREENS
COLLECTION

PETAL PEARLED ALLIGATOR GARNETS

May this design serve you by inspiring you to open your heart and allow your inner wisdom to guide you. Remember, alligators wait patiently for opportunities and take them when they can. You'll know when the time is right to make a move. All you have to do is stop overthinking, stop overanalyzing, and trust that your heart knows what is right.

GREEN "ALLIGATOR" GARNETS

The green garnet is a calcium aluminum silicate, which belongs to the Grossularite family of garnets. Judy Hall's The Crystal Bible, states that these are "useful stones[s] to have during challenges and lawsuits. It teaches relaxation and going with the flow, and inspires service and cooperation. This stone enhances fertility and aids assimilation of Vitamin A. It is excellent for arthritis and rheumatism and fortifies the kidneys. It is beneficial for the skin."

CHALCEDONY OF WEALTH

Chrysoprase is a form of silica, much like sand or quartz, but it is made distinctive by the deposits of nickel in the stone that give it a distinctive green colour. The Ancient Greeks said that chrysoprase was the sacred stone of Aphrodite, [the goddess of love] whose sacred colour was green.

Green Chalcedony, also known as "Chrysoprase" relates strongly to the Heart Chakra. The vibrant green colors can trigger the energy body to reconnect with our heart, reminding us that forgiveness and unconditional love is a daily practice.
