

YOUR PROFILE

Aging . Dry

DERMALDIAGNOSIS™

Your Profile

You enjoy an even skin tone but are more prone to develop dryness and wrinkles. Your impaired skin barrier leads to dehydration.

Fortunately, your skin is resistant to inflammation and pigmentation. You have only two barriers to skin health: dehydration and aging. Your skin type can easily be managed with an effective daily skincare regimen and lifestyle habits, such as wearing sunscreen and avoiding deliberate tanning.

The age range for Aging.Dry (AD) skin types are usually 30 years or older. If you are over 30, it is also time for you to add skin protective strategies, even if you avoid the sun, smoking, and other harmful habits.

Treatment Objectives

1	Repair damaged skin barrier and restore barrier function.
2	Hydrate and moisturise skin on cellular level.
3	Increase your cell turnover and smooth skin texture.
4	Prevent and correct premature skin aging including lines and wrinkles.

Aha ¹⁰ Glycolic acid	UVB Filters	A Antioxidants	C ¹⁰ Vitamin C	P ¹⁰ Peptides	Nc ⁴ Niacinamide
UVA Filters	F Essential fatty acids	Ha ² Hyaluronic acid	EmL Emollients	M ¹ Mandelic acid	Ra ³ Retinol

Your Frustrations

- Dry, rough and uncomfortable skin texture.
- Premature skin aging.
- Impaired and dehydrated skin barrier.
- Skin that may feel dull and lifeless.

Your Goals

- Bright, hydrated and healthy skin.
- Protected, smooth and healed skin barrier.
- Prevention and correction of premature skin aging including lines and wrinkles.

Aging . Dry

Your Treatment Regimen

AM.

CLEANSE	1. Renewal Facial Cleanser
REPAIR	2. Collagen serum
HYDRATE & PROTECT	3. DermDefence SPF 50

PM.

1. Renewal Facial Cleanser
2. Retinol serum Glycolic gel
3. DermNourish

SCAN HERE

- In the beginning apply Glycolic gel once per week instead of Retinol serum.
- When and if your skin can tolerate Glycolic gel, apply it 2-3 times per week instead of Retinol serum.
- Do not use DermNourish and Glycolic gel on the same night. DermNourish will lower the efficacy of Glycolic gel by altering the pH.

YOUR TREATMENT PLAN

Aging . Dry

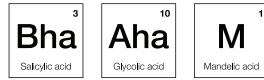

CODE: AD

DERMEXCEL™

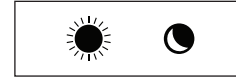

Cleanse

RENEWAL FACIAL CLEANSER

This treatment cleanser will help defend skin against the stress of airborne bacteria and urban pollution contributing to skin aging, pigmentation and inflammatory skin conditions.

Renewal cleanser gently exfoliates dull, dead skin on the surface and speeds up cell renewal at a deeper level, restoring purity and radiance.

Apply on dry skin. If you apply your cleanser to dry skin, you are able to circulate the cleanser over your eyes without burning or stinging.

Keep the cleanser on your skin for 3 min or longer.

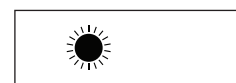

Repair

COLLAGEN SERUM

A powerful antioxidant serum that will brighten the skin tone and reduce signs of aging.

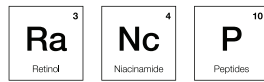

Collagen serum will visibly plump skin, enhance skin tone, reduce pore size, and smooth lines and wrinkles.

Apply in the morning on cleansed skin before any other product.

For quick and deep absorption, apply serum to damp skin after cleansing. Moist skin is more permeable than dry skin.

RETINOL SERUM

This advanced formula has a phenomenally restorative influence on the many layers of the skin.

Aging prevention & correction: Retinol prevents and corrects signs of aging on a cellular level by stimulating collagen production and by preventing the degradation of collagen and elastin.

Apply in the evening on cleansed skin before any other product.

For quick and deep absorption, apply serum to damp skin after cleansing. Moist skin is more permeable than dry skin.

Renew

GLYCOLIC GEL

This treatment targets signs of sun damage including dull and sagging skin, wrinkles, and pigmentation.

Collagen production and skin hydration levels will improve, resulting in firmer and healthier skin.

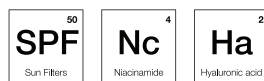

Apply in the evening on clean and dry skin.

Leave on during the night and rinse off in the morning.

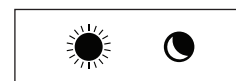

Hydrate & Protect

DERMDEFENCE SPF 50 & DERMNOURISH

DermDefence SPF 50 is a revolutionary sunscreen that combines very high UV protection with cellular and DNA protection.

DermNourish is a moisture-rich, reparative formula that dramatically replenishes hydration to dry, sensitive or compromised skin.

DERMDEFENCE:
Apply every morning.

DERMNOURISH:
Apply at night according to your Dermal Diagnosis treatment regimen.
