 RACK YOUR BOARD
www.rackyourboard.com

Introduction

It's not every day that you buy a product that's actually useful. In a world of smart watches and paid Instagram followers, sometimes you need to just break the mold and purchase a physical product that does what it's meant to do.

At Rack Your Board, we're here to help you do just that. Maybe your board is resting against the wall in your garage and keeps slipping out or maybe it fell off of the top of your car on the way to the beach because you tried to tie it up with old rope and bungee cords (let's hope not). Whatever your reason, we're glad you're here.

This guide was constructed to help you pick the right rack. There are a lot of factors to consider, such as:

How many boards do you have?

We offer a variety of racks that can hold up to six boards at a time. There's no sense in only hanging one board if you have three or four.

How much do they weigh?

This is a big consideration. Some of our less expensive racks are designed for short or fish boards. It would be unwise to skimp on quality to save a few bucks, then have your longboard or SUP pull the rack out and damage your wall. Keep weight and length in mind.

Where will the rack be hung?

Do you have room on your wall for a rack? If not, you might want to look at our selection of ceiling racks. If you have extra space, you could even go with multiple racks for each room in your home. We have designer surf racks as well as basic racks.

What are the sizes of my board?

General considerations: Height, Weight, Width, Length. The Basics.

What are the specs on the rack?

Know how big your wall is; know how big your board is. Find the studs in the wall and **MAKE SURE YOU HAVE SPACE.**

Surfboard Racks

3 Board Horizontal Rack (by Corsurf)

This beautiful dark stained wood surfboard rack is perfect for storing and showing off your boards in any room. The elegant finish gives it appeal while the design gives it function. You can store as many as 3 boards, even heavy longboards. The arms have purpose built “notches” allowing you to tilt your board up for display. Or simply lay them flat for general storage. The racks arms are 14 inches long and spaced 7 inches apart. You can also make this 3 board rack a 2 board rack and display both boards in an upright position.

Benefits:

- Beautiful natural hardwood base plate and arms
- Easy mounting
- Will fit ANY surfboard, wake, kite, snow too!
- Made for storage or board display
- Arms are 45 degree angle
- Protective rubber strip to ensure board safety

www.rackyourboard.com/products/corsurf-angle-3-board-wood-rack

Gatekeeper Surfboard Racks

This rack's attractive simple design will allow you to proudly install it in any room in your house. The unique support arm shape allows for easy on/off, without accidental damage to your board. All racks have quality Nitrile Foam Tubing to ensure board safety, no scrapes or scratches. A matte black powder coat finish is applied to all racks. All the mounting hardware you will need is included in every Gatekeeper Rack. Holds shortboards or longboards!

The ceiling base rack comes with 2 base mounting plates plus 2 support arms to hold 1 surfboard. You can purchase as many additional support arms (packages of 2) as you like. However, the maximum recommended weight regardless of how many arms you attach is 120lbs.

Benefits:

- High quality Nitrile Foam tubing
- Multiple board capacity - up to 120lbs
- Support arms are spaced 12” apart for big fins
- All steel welded construction
- Sturdy 1” steel support arms
- Install fasteners (1/4”x3” lags and flat washers)

Surfboard Ceiling Rack by Calfin

Calfin surf racks are super functional, purpose built, and possibly the easiest racks to mount on the market today. All Calfin Surf Racks come with mounting hardware and require very little “know how” to successfully mount them. Heavy Duty lag bolts for mounting are included. They are proudly made in the USA. But what is more, is they source their raw materials from American suppliers too. Giving you a 100% USA made product! Ideal for shortboards or longboards.

Benefits:

- High strength steel box tubing 5/8”x5/8”
- Super soft foam padding for protection
- Protective custom vinyl end caps
- Heavy duty lag bolts for mounting
- Ideal for shortboards OR longboards
- Quality Zinc plated bolts

www.rackyourboard.com/products/calfin-ceiling-mounted-surfboard-rack

Hawaiian Gun Rack

The Hawaiian Gun Rack is truly unique in the surfboard racks market. Hand made in the USA from quality laminated hardwoods, this rack will hold most surfboards weighing 25lbs or less. The design is intended to show off the board, not the rack itself. It makes for a beautiful wall mount application. Also designed with function in mind as you can easily take your board off and on with little effort.

Benefits:

- Laminated hardwood plys
- 2 colors - Blonde and Brunette
- Holds boards up to 25lbs
- 2 Racks per set
- 2 Anti-slip pegs pre-installed
- Wall stud mounting screws
- Drywall mounting hardware & instructions
- Will display 1 board horizontally
- Hand made in the USA

SUP Racks

Beatnik SUP Hand Rack

The SUP hand rack by Beatnik is purposely designed for stand up paddle boards. They are large and have protective padding and anti slip pegs for security. The hands are twice as large as their regular surfboard hands.

Solid hardwood hands will hold your board while you're not using it. Made from non-endangered tree wood and hand carved into the shape of human hands. They come with pre-drilled holes for direct wall stud mounting. Will hold any size stand up paddle board (SUP) or any other board for that matter.

They have a foam strip on the hand surface to protect your board rail. Also, there is a peg mounted on each hand to prevent the board from slipping off. All mounting hardware is also included. Truly a one of a kind SUP Rack.

The O'ahu SUP Rack line.

The O'ahu is a big honkin' rack. Designed for SUP display and storage, it makes use of bamboo's natural strength holding 3 SUPs, no problem. The O'ahu is perfect for the SUPer/surfer who has multiple boards of multiple sizes... display and store anything from 3 large SUPs to a SUP and two short boards. The bottom hooks conveniently hold paddles, wetsuits, helmets, etc.

Features:

- Made entirely from incredibly strong, solid, and beautiful bamboo ply.
- Provides a functional and stylish way to display and safely store your boards.
- Adjustable to fit any type of board (surf, snow, long, wake, skate, etc.)
- Easily holds 150+ lbs.
- Newly engineered mounting system makes installation simple and easy.
- Hot-iron branded and authenticated with Grassracks' official logo.
- MADE IN THE USA

Gatekeeper Ceiling SUP Rack

Gatekeeper SUP ceiling Rack is perfect for getting your boards off the floor and out of harm's way. Mounted securely to the ceiling is the about the best way to store them while not in use. The ceiling base rack comes with the base 2 mounting plates plus 2 support arms to hold 1 SUP. You can purchase as many additional support arms (packs of 2) as you like. However, the maximum recommended weight regardless of how many arms you attach is 120lbs.

Benefits of Gatekeeper Ceiling SUP

Racks:

- High quality Nitrile Foam tubing
- Multiple board capacity - up to 120lbs
- Arms tips are angled for security
- All steel welded construction
- Sturdy 1" steel support arms
- Wide support base for secure mounting
- Install fasteners (1/4"x3" lags and flat washers)
- Holds any style SUP

www.rackyourboard.com/products/gatekeeper-ceiling-sup-rack

The Big Boarder

This rack is definitely for the strongest SUP enthusiasts. Those of you who love their boards so much, you want them on display at all times you're not in the water. The Big boarder is the rack for you. With its original design, cut out and mounted using the highest quality bamboo, this rack tops them all for individual SUP display.

Features:

- Made entirely from incredibly strong, solid, and beautiful bamboo ply.
- Provides a functional and stylish way to display and safely store your boards.
- Adjustable to fit any type of board (surf, snow, long, wake, skate, etc.)
- Easily holds 150+ lbs.
- Newly engineered mounting system makes installation simple and easy.
- Hot-iron branded and authenticated with Grassracks' official logo.
- MADE IN THE USA

Snowboard Racks

Natural Log Snowboard Wall Rack

Store up to 4 of your snowboards in style with the premium recycled log wall rack. This rack is handcrafted from pine beetle wood in Colorado. Yes, it's a real log! Plus it's easy to install in less than 5 minutes. With 4 pre-drilled holes, hanging this rack is super easy.

Features:

- Solid construction. Can hold up to 100 lbs.
- Angled slots cradle your boards
- Slots are thick enough to hold skateboards, snowboards, and longboards
- Comes with 4 pre-drilled screw holes for easy wall mounting

www.rackyourboard.com/products/natural-log-snowboard-wall-rack

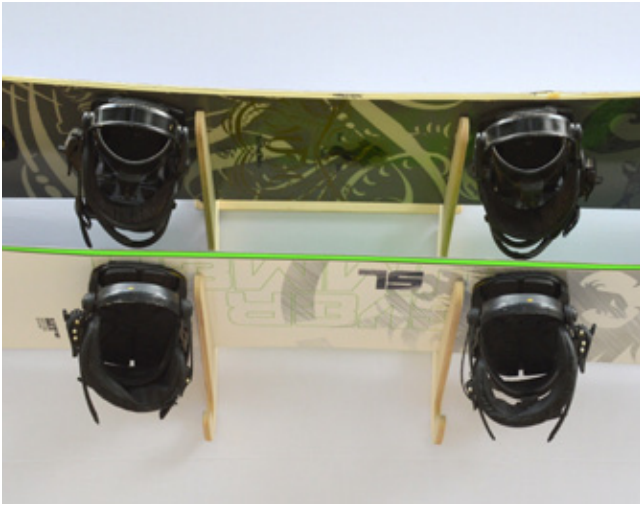

Snowboard Wall Mount Rack (armed)

This rack is solid for holding anywhere from 1 to 5 snowboards. The foam padded arms keep your board safe while the stylish birch wood puts your boards on display for all who enter your humble abode to appreciate.

Features:

- Solid construction. Can hold up to 100 lbs
- 11" arms are solid birch 3/4" inch thick with foam padding to protect your boards
- Arms angled at 15 degrees
- Routed finished edges
- 4 pre-drilled screw holes and mounting hardware for easy hanging

www.rackyourboard.com/products/snowboard-wall-mount-rack-armed

The Baltic Snow

The Baltic Snow is the rack for all you powder hounds. When you're not on the slopes getting deep turns you want to put your boards or skis in a safe spot, and the Baltic Snow is up for the task. Just like our other racks this one is hand crafted from baltic birch ply and has the same simple mounting design. Just mount the birch cross beam and spacers to your wall, then hang the brackets at any width you'd like. Then, sleep soundly knowing your snowboards and skis are safe!

Features:

- Baltic birch plywood, cross-banded layering, void-free core
- Routed finished edges
- Solid construction. Can hold up to 120 lbs
- Slots fit skis, snowboards, skateboards, and longboards

www.rackyourboard.com/products/snowboard-rack-baltic-snow

The Tripped Barrel

- Adjustable arms allow you to fit any type of board. (surf, snow, skim, paddle, skate, skis, etc.)
- Provides a functional and stylish way to safely store and display your favorite board.
- Newly engineered mounting system makes installation simple and easy.
- Made entirely from solid bamboo ply, not merely a bamboo veneer.
- Beautiful bamboo grain.
- Unique designs allow for racks to be hardware free aside from Wall Mount Bar.
- Tested to hold 150+ lbs.
- Hot-iron branded and authenticated with Grassracks' official logo.
- MADE IN THE USA

Kayak Racks

The Moose Rack Hull Pro

Hull Pro kayak rack by The Moose Rack will carry a load of 300lbs and will work with every style kayak. The mounting system allows it to pivot 180° when not in use.

Hull Pro by The Moose Rack is a stylish and uber functional Kayak wall rack system. The support arms are made from stainless (tube) steel and covered with high quality Nitrile Foam. There are separate billet T6 anodized aircraft aluminum brackets which the support arms attach to. Why the separate brackets you ask? It's because this racks has the ability to pivot 180° and lock in position to store it flat against the wall when not in use! It's weather proof and will work anywhere and under any conditions. Hull Pro has a weight capacity of 300lbs.

Benefits and Features:

- Stainless steel tubing
- High quality nitrile foam
- For kayaks of all styles and shapes
- Pivots 180° and locks into position
- Large wall contacts eliminate drywall marks

www.rackyourboard.com/products/the-moose-rack-hull-pro

Kayak Wall Rack (by Calfin)

Calfin kayak racks are super functional, purpose built, and possibly the easiest racks to mount on the market today. All Calfin kayak racks come with mounting hardware and requires very little “know how” to successfully mount them. Heavy Duty lag bolts for mounting are included. They are proudly made in the USA. But what is more, is they source their raw materials from American suppliers too. Giving you a 100% USA made product! This Kayak rack has specialized double bends to allow for all shapes and sizes of Kayaks.

Benefits of Calfin Kayak Rack:

- Double bend to fit all sizes
- High strength steel box tubing 5/8”x5/8”
- Super soft foam padding for protection
- Protective custom vinyl end caps
- Heavy duty lag bolts for mounting
- Ideal for any style Kayak
- Quality Zinc plated bolts

Vehicle Racks

So, you got a new surfboard and you're ready to take it to the beach and get in the water before you realize: "How am I going to get the board there?" You could grab some bungee cords and cross your fingers, or you could take a look at some of our rooftop racks. This guide is meant to help you pick and figure out exactly which rooftop rack you need (depending on your car) as well as give you an inside look at some of our more advanced storage and transport options for your boards.

1. Rack Pads

If you drive an SUV, chances are that you already have a rack mounted to the roof. Most SUVs today come with some sort of roof rack to accommodate a variety of transport needs including roof boxes, extra luggage, and surfboards. However, most of the time, these roof racks are made of a hard plastic that could scratch or otherwise damage your board. If this sounds like your vehicle, you will probably be most happy with Rack Pads. Rack Pads are easy to install with Velcro edges, and can be wrapped around your existing vehicle rack to provide a soft cushion to protect your board from damage.

Rack pads are only designed to protect your board from damage on your existing hard-top roof rack, so your board will still need to be secured using tie-downs or some other kind of rope.

www.rackyourboard.com/products/blocksurf-surfboard-rack-pads

2. Soft Racks

Soft Roof racks are perfect for cars that you may not want to permanently install a rack onto. Soft Racks such as the Blocksurf Wrap Rax will work on virtually any vehicle as they are adjustable and easily install by wrapping the cords through the inside of your vehicle and tightening the straps to fit. The extra stability from the rack being secured by your closed car doors make this rack extremely sturdy while still giving you the option to remove it from your rooftop after each use.

These racks also have adjustable straps on top to secure your surfboard to the rack itself. No additional tie-downs or ropes are needed when using this type of rack to transport your board.

www.rackyourboard.com/products/blocksurf-wrap-rax-double-surfboard-soft-roof-rack

3. Hard Racks

Hard roof racks are typically the safest option for transporting your boards, especially for long trips or when traveling at high speeds. There are two types of hard vehicle racks to consider when purchasing and they depend on whether or not your vehicle has rain gutters running along the rooftop.

Classic Rooftop Surf Rack

This rack will require some basic assembly, and generally comes with 2 metal bars wrapped in foam, tension pull straps, and 4 clamps. The 4 clamps will attach directly to your rooftop rain gutter as this provides stability for the bars that will run across the top of your vehicle. If you're not sure whether or not your vehicle has rooftop gutters consider this: Most cars produced after the early 1990s don't have roof gutters. So if your car is from this decade, you'll want to go with the gutterless rack (most likely)

Gutterless Rooftop Rack

For cars without a rain gutter, The Gutterless option of a hard roof rack will be the right choice. Instead of clamps that attach to the car's rooftop rain gutters, gutterless racks come with 4 small clips that attach to the rubber lining at the top of your car's door well. Simply open all 4 car doors and attach these clips. Then, pull the tension straps tight and close the doors. The pressure from the closed doors on the straps will give you the necessary stability to ensure this rack won't move anywhere, along with the rubber base of the rack which will sit directly on your rooftop

www.rackyourboard.com/products/rooftop-rack-transport-system-sport-rack

4. Tie-Downs

Tie-Downs are essential for extra board security on your rooftop or in the tailgate of your truck. Tie downs are simple straps that usually come with some sort of tension pull to ensure a snug fit for your surfboard. There are countless varieties of tie downs ranging from the most basic, to those made with Steel Core Security. Your choice will reflect your use. If you're simply driving from your house to the beach and back, a more basic model will suffice, but if you'll be leaving the boards on your rooftop unattended, you may want to consider the higher security tie-down straps to prevent theft.

www.rackyourboard.com/products/steel-core-security-tie-downs

5. Tailgate Rack

Surfboard tailgate racks are exactly what they sound like, a more secure way to carry your Surfboard or Stand Up paddle board in the tailgate of your truck. The tailgate rack includes a foam pad with durability to hold your board while still providing a soft surface to prevent damage. The pad attaches to the back of your tailgate and includes clinch straps to secure your board and prevent any sliding. These basic racks are essential to those using a truck to transport boards to the beach and not only prevents damage to your board, but also damage to the back of your truck.
