

INSTRUCTION GUIDE

The Tie Downs™

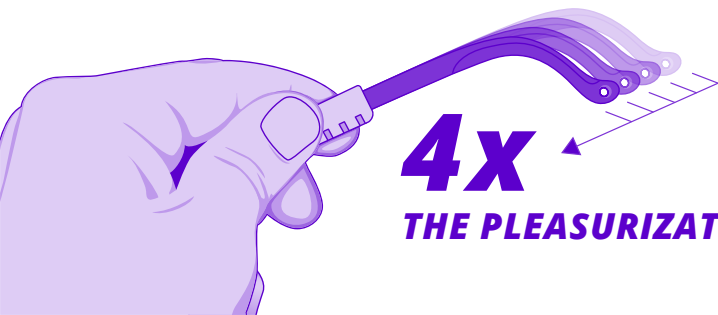

The Tie Downs included with your Pit Vipers clip into the holes at the end of your Love Handle earpieces. Tie Downs shackle your Pit Vipers around your head or neck, if you're into that sort of thing

The E-Spot™ Adjustment

This adjustment refers to the depth of the earpiece. All the way in or all the way out. How deep do you want it in?

There are 4 distinct settings for the E-SPOT™ and it is paramount you find your preferred setting. Note: The earpieces may be a little sticky at first but there is no trick to it, just use your big strong arms and your nice firm grip to move them to the appropriate depth.

The Turbo™ Adjustment

Let's face it, optimum face-sitting is only achieved when you find that perfect angle.

If you had a girlfriend she would say the same thing. Turn it all the way up to Op-Turbo™; perfect for those low-effort scenarios OR turn it all the way down to Full Turbo™ for the highest intensity situations.
