

INSTRUCTION GUIDE

The Speed Harness™

The Speed Harness™ included with your Pit Vipers slide into the openings at the end of your Grand Prix earpieces. The Speed Harness™ shackles your Pit Vipers around your head or neck, if you're into that sort of thing.

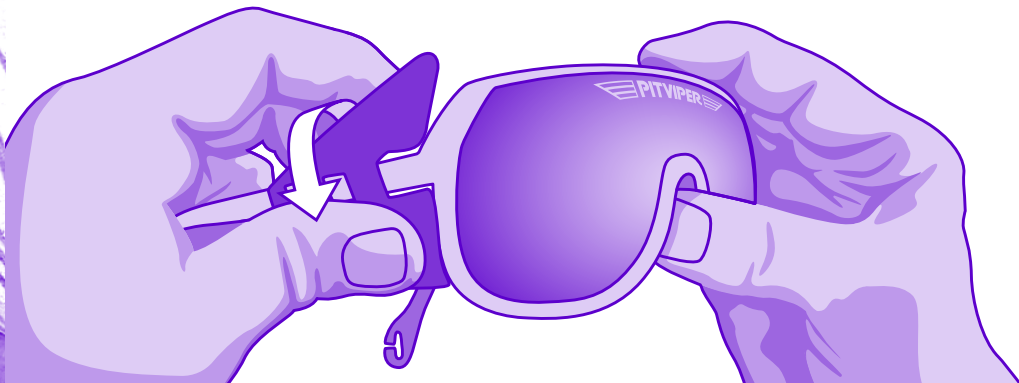

A black earpiece is shown horizontally, with a black Speed Harness strap attached to its end. The strap is a thick, black, flexible material. The word 'PITVIPER' is printed in white on the black strap, flanked by two white wing-like symbols. The earpiece is shown in a perspective view, curving upwards and to the right.

PITVIPER

The Side Pieces™

A Side Piece™ on the left, a Side Piece™ on the right - this must be a dream. The kind of dream your spouse gets mad at you for having. Just don't tell them this time. It'll be our little secret. Included with all Grand Prix are 2 Side Pieces™.

Although the nerds at OSHA require Side Pieces™ to be worn in order to meet the Z87+ safety rating, you can ditch or switch your Side Pieces™ to customize your look. Try *The Grand Pry* method, peeling the Side Pieces™ away from the frame to remove them.
