Dear Partner,

We at Feeding India by Zomato would like to sincerely thank **'The Plated Project (a brand owned and operated by MOONREEF INNOVATIONS LLP)'** for your contribution of Rs. 90,500 towards the 'Daily Feeding Program' through June 2021. These funds have helped us distribute 10,648 meals to 500 beneficiaries for 37 days in Bhagalpur.

You have our sincerest gratitude for your dedicated effort in helping us spread awareness about our initiative and look forward to partnering with you in the future.

Feeding India by Zomato is a not-for-profit that designs interventions to solve hunger within the underserved communities of our country. Started in 2014, Feeding India is present across 100+ cities in India and has served 150+ million meals till date.

Over the years, we have also gone beyond our call of duty and have been the first to act to serve our country during national emergencies, such as the 'India Needs Oxygen' campaign through which we supplied over 9,000 oxygen concentrators and set up 4 oxygen plants. Our endeavour with this program is to reduce the response time and offer immediate support to victims affected by disasters like floods, cyclones, earthquakes, epidemics, and other emergency situations across the country.

For more information on our initiatives, you can visit our website www.feedingindia.org/.

Thank you.

Regards,

Vishal Kumar

Head – Feeding India by Zomato
