Data sheet

ActSafe REPLACEMENT BATTERY

Powerful battery to extend the ACX POWER ASCENDER kit (POA-001) when more than two batteries are required for one device. The quick-charging battery has an electronic management system with LED display that provides information on its charge status at all times. With a user load of 100 kilogrammes, one battery charge is sufficient for up to 200 metres of rope. At higher weights, the battery performance is correspondingly somewhat lower.

FEATURES

Temperature: _____ from 40 °C to _____

DIMENSIONS

Weight: _____ 2,5 kg _____
