Choose a configuration for your Scout Letter Board. The rails can be installed below one another, or side-by-side.

2

Select a wall space to install the Scout Letter Board. The rails should be fixed into studs or a solid wall. Insert the first screw in the left hole on what will be your bottom rail.

3

Using a level, position the first rail (the one that will sit the lowest) on the wall. Fasten the screws to ensure the rail is securely fixed to the wall.

4

Place the next rail directly above the first rail. Using this as a guide, position and fix the second rail onto the wall. Continue this method for the remaining rails. Continue to use a level to make sure the rails remain parallel through this process.

5

It is time to create your messaging. Then slide the letter blocks one by one onto the rails from either end.

6

If extra letters are needed you can apply stickers which are provided with the letter packs - found under the lid.
Hint: Use a kraft knife to lift stickers off the sheet.
