

AEROPRESS

KALDI'S COFFEE
ROASTING CO.

est. 1994

WHAT YOU NEED:

- your aeropress
- stirring device
- 33g (1.18oz) fresh roasted Kaldi's Coffee (fine grind)
- 113g (4oz) filtered water (195° - 205°)
- timer (set for 1 minute)
- gram scale

WHAT TO DO:

- 1** Place filter in Aeropress & preheat Aeropress by pouring hot water through it
- 2** Add coffee to bottom chamber of Aeropress & place on scale; tare scale to zero with cup underneath the Aeropress
- 3** Start timer & add 113g (4oz) of water
- 4** When all the water has been added, stir the slurry (coffee & water mixture)
- 5** When timer reaches 1 minute, stir slurry, add top chamber & press like mad
- 6** Should produce a concentrated drink that can be enjoyed on its own or when diluted with equal parts hot water to produce a more Americano-like beverage

ENJOY!
