

#### Notice for Use

Thank you for choosing Eleaf products! Please read this manual carefully before use so as to use correctly. If you require additional information or have questions about the product or its use, please consult your local agents, or visit our website at www.eleafworld.com.

### **Product Introduction**

The MELO 300 features a new powerful ES Sextuple-0.17ohm Head that consists of six coils and is rated at an ultra high power of 100-300W for huge vapor production. The retractable top fill system makes it really easy to fill the tank. You just need to slide the drip tip back and it reveals the fill port. The airflow can easily be adjusted by turning the control ring with knurled design. In addition, the MELO 300 comes in two kinds of e-liquid capacity for you to choose from: 3.5ml type and 6.5ml type.

- 1. Drip a few drops of e-liquid directly into the coils to make them fully saturated before first use:
- 2. Screw the primed atomizer head onto the atomizer base tightly;
- 3. Put the glass tube on, and screw the top cap with mouthpiece on;
- 4. Slide the mouthpiece back to reveal the fill port, slowly fill e-liquid into the tank through the port, and then close the retractable top after filling.
