"With a large custom millwork scope on the project, we had no quality concerns related to the installation of the panels. The Star Hanger System helped mitigate concerns with imperfect existing building conditions, and provided an installation system that coordinated well with other trades in a tight scheduling window."

- Terry Buchmann, Garvin Design Group

"My first experience with the Star Hanger System was on a multi-story renovation project in Columbia, South Carolina, with a tight schedule. The design required multiple existing concrete columns as well as framed new divider partitions, both with power and data outlets, to be wrapped with wood veneer panels on four sides. I was, quite frankly, amazed at the ease of installation, the simplicity of the system, and the speed with which the work was accomplished to the benefit of the project. I definitely believe the use of the Star Hanger System to be beneficial whether time is a major factor or not."

- Charlie Wilson, Lead Field Superintendent, McCrory Construction
