MAGNETIC ATTRACTION

Magnetic central bolt.

Closing lock with the block of the bolt leaving free the rotation of the handle.

Maximum silence in the handle and in the closing thanks to the compactness of the mechanism.

Ambidextrous closing: eliminated the action of inversion of the bolt.

Front plate without protrusion: the magnetic bolt retracted inside the case comes out only when drawing near the upright with consequent easier of the packaging, the movement and the transport.

High performance in a little space:

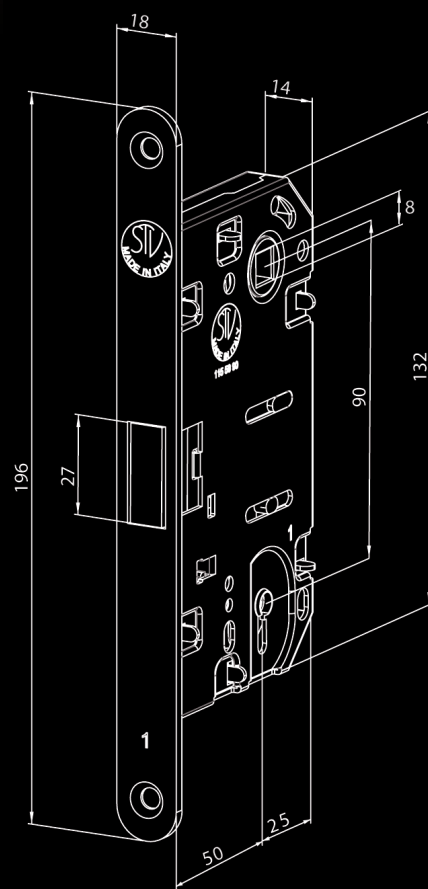

- reduced the times of the panels and the frames manufacture
- saving time on manufacture cycle
- technical innovation
- aesthetic innovation

Available upon request with **metal bolt** coupled to the finish of the lock and the handle

QUALITY AND INNOVATION MADE IN ITALY

High products quality, advanced technologies, severe controls on every phase of workmanship and maximum attention for the environment make of STV SERRATURE a modern firm, always projected to the future. The conferment of important recognitions and quality certificates as **ISO EN 9001:2008** testifies all the passion and the enthusiasm of all these years. The studies of the improvement of productive procedures and environmental guardianship are the symbols of a responsible industrial development, in social and environmental care. STV SERRATURE has gotten with pride the **mark "infinitely recyclable"**: this means that all the materials used are recyclable. **Specific know how** which comes from decennial experience, the usage of **technical and human resources** supported by important economic investment and the owners' devotion, contribute every day to the growth of the value of an Italian firm that has known how to expand and affirm his success in all the world. Primary objective for STV SERRATURE is to offer to his customers **the research and development of new solutions and new products**. "Now the firm presents you the new lock "ATTRAZIONE": essential, compact and precise in the mechanisms, even in the silent version with the metal bolt".
