

PAPER STENCIL SCREEN PRINTING

Step 1

Draw the outline of the image you wish to print.

Step 2

Using a craft knife cut out the image. You want to keep the outline of the image and any infill pieces.

Step 3

Stuff the garment with a sheet of newspaper to stop ink reaching the rear of the garment.

Step 4

Position your stencil where you want the image to be, remembering to position any infill pieces.

Step 5

Lay your taped screen onto the stencil. Check there are no gaps around the outside of the stencil.

Step 6

Put a thick bead of ink along the top edge of your screen.

Step 7

Flood your screen with ink by pulling the squeegee across it lightly at a 45° angle. Then repeat with a little force.

Step 8

Lift the screen from your garment (like opening a book). Leave to dry then iron to fix inks.
