## **Finger Cots**

**Applications:** Microelectronic, semiconductor, circuit board, electronics, parts handling.

## Class 100 Anti-Static Finger Cots

## **Class 100 Anti-Static Finger Cots**

These cost-effective finger cots provide excellent protection from skin salts, flakes, oils, and other particulates. Ideal for use in small parts handling where a full glove is not needed.

These cots are designed with a proprietary anti-static agent that yields average surface resistance of 5 X 10<sup>12</sup> per square surface unit, virtually eliminating electro static discharge. DI washed powder-free, the thickness of these cots is a mere 3 mil, tissue weight sheer film insuring maximum dexterity and relief from finger fatigue.

Class 100 processed and packed 10 gross per vacuum sealed ESD-safe polybags.

## Features and Benefits

## **Class 100 Anti-Static Finger Cots**

- ▲ Surface Resistivity...... 5 X 10<sup>12</sup> Per Surface Unit<sup>2</sup>
- ▲ Ultimate Tensile Strength Ibs/in²...... Not Less than 4,500
- ▲ Ultimate Elongation, %...... Not Less than 800%
- ▲ Tear Resistance...... Very Good
- ▲ Chloride Level...... Typically Less Than 500 Parts Per Billion
- A Recommended for Use with Class II Static Sensitive Devices.
- ▲ 3mil Thickness
- ▲ Excellent Protection From Skin Salts, Flakes, Oils and other Particulates
- ▲ Ideal For Use in Cleanrooms
- ▲ Class 100 Processed and Packed in ESD-Safe Bags
- ▲ Sizes Small-Extra Large
