Wireless charging for Qi wireless compatible devices

Charge the Powerpod itself by a USB Port

Charge the Powerpod itself by AC power adapter

place power bank on top of a wireless charging pad

Charge the Powerpod itself by a charging pad

Safety Instructions

- Do not throw the Powerpod into fire or try to heat it. In such situations it might burn, explode or release toxic gas
- Do not connect the micro USB input and USB output ports with a single cable.
- Do not try to open the Powerpod by yourself or break it.
- Do not put the Powerpod in water or make it wet.
- Do not use Powerpod if you notice it is leaking, hanging itself, out of shape, smelling or any other abnormal phenomenon.
- Do not use the Powerpod at higher temperature than 60°C. The recommended ambient temperature is between 15°C and 25°C.

Storage and Maintenance

- If you will not use the Powerpod for a long time, please at least once a year fully charge it, then discharge it by some other devices, then recharge it to half capacity and then keep it in a cool and dry place.
- It is recommended to perform a complete charging and discharging every 3 months so as to ensure the best status of the battery cells inside.
