6. Please place the product out of reach of children.

Package Contents:

LED Make-up Mirror & Power Bank ×1
Micro USB cable ×1
User Manual ×1

Charge the power bank:

Connect the Micro USB connector of Micro usb cable to the Power bank input port. Connect the other end of the cable to computer or power adapter USB Out.

Use power bank to charge a digital device:

Connect the USB connector of Micro usb cable to the power bank output port and the other end to digital device charging port, then it will begin to charge automatically.

When charging is complete, please unplug the cable.

Protective Function:

- Output with constant voltage, over-voltage protection.
- Output with current-limiting, over-current protection. Release the over-current protection, output will recover automatically.
- Output short circuit protection. Short-circuit USB output interface will stop output and protect the product. If the short-circuit is released, output will recover automatically.
- Built-in battery protection. Double protective functions for built-in battery.

Warning:

- Ignoring following safety instructions may lead to fire, electric shock, or damage to the digital device.
- Do not drop, disassemble, squeeze or expose to high temperature or to water.
- Please stop using it immediately if power bank or digital device swells or becomes deformed.
- Please keep away from children.
- Please dispose of product carefully.

Attention:

- Before charging digital devices, please make sure that the cable and connector are correctly connected. We recommend using the device's cable or a Powerpod cable to avoid damaging the digital device.

Storage and Maintenance:

If you do not use the portable battery pack for a long period, please follow the instructions below every 12 months to maintain its normal functions:

First, fully charge the portable battery pack, then discharge the power by an outer device. Finally, recharge it to half capacity, and store in a cool and dry place.

It is recommended to do a complete charging and discharging every 3 months to ensure the best status of the battery cells inside.
