

## Blaster-X Control Switch Installation Instructions

- 1) Drill a 1/4" diameter hole in the desired mounting location.
- 2) Arrange the hardware as shown in the diagram to the right. Make sure there is a nut on BOTH sides of the mounting surface.

- 3) Secure the switch in place without over-tightening it.
- 4) Connect the BLACK wire to any ground point (battery negative, or frame).
- 5) Connect the GRAY wire to the GRAY wire on the Blaster-X Tail Light. Use a crimping tool to crimp on the supplied female butt connector to the gray wire on the tail light.
- 6) Follow the programming instructions for your tail light. The Programming instructions ship with the tail light, and can also be downloaded from the product page on our website at <http://www.CustomLED.com>.
