* Annual tonnage does not require registration or the registration is envisaged for a later registration deadline.
** Please notice that substance properties used for the hazard assessment of the mixture come from graphite (bulk substance, CAS 7782-42-5). The properties of the nanoform are under evaluation and to some extent not known.

### SECTION 4: First aid measures

#### 4.1. Description of first aid measures

**Inhalation**: In case of discomfort provide fresh air, warmth and rest, preferably in a comfortable upright sitting position. Rinse nose and mouth with water. Get medical attention if any discomfort continues. If breathing stops, provide artificial respiration.

**Ingestion**: NEVER MAKE AN UNCONSCIOUS PERSON VOMIT OR DRINK FLUIDS! Rinse nose, mouth and throat with water, and then drink plenty of water. Get medical attention.

**Skin contact**: Wash skin with soap and water. Continue to rinse for at least 15 minutes. Get medical attention if irritation appears after washing.

**Eye contact**: Do not rub eye. Immediately flush with plenty of water for up to 15-20 minutes. Remove any contact lenses after 5 minutes, maintain open eyes wide apart. Get medical attention promptly if symptoms occur after washing.

#### 4.2. Most important symptoms and effects, both acute and delayed
Inhalation  It may cause irritation to respiratory tract/inhalation  

Ingestion  No effects recorded  

Skin contact  It may cause skin irritation.  

Eye contact  It may cause eye irritation.  

Delayed effects  No delayed effects known.  

4.3. Indication of any immediate medical attention and special treatment needed  

Treat symptomatically. Contact a poison centre immediately in case of ingestion or inhalation of a large amount of product. Specific treatment: No specific treatment.  

SECTION 5: Firefighting measures  

5.1. Extinguishing media  

Suitable extinguishing media: The mixture is not combustible, use extinguishing measures that are appropriate to local circumstances and the surrounding environment.  

5.2. Special hazards arising from the substance or mixture  

In the event of combustion or thermal decomposition, this material may release carbon monoxide (CO) or carbon dioxide (CO2) or other toxic gases.  

5.3. Advice for firefighters  

In general, this product is difficult to combust. Normal care should be taken to avoid dust explosion risk caused by high concentrations of dust or finely suspended airborne particles. Use respiratory protective equipment.  

SECTION 6: Accidental release measures  

6.1. Personal precautions, protective equipment and emergency procedures  

Emergency responders should wear suitable protective equipment to prevent inhalation or skin contact. In case of spills, beware of slippery floors and surfaces.  

6.2. Environmental precautions
Do not allow to enter drains, sewers or watercourses. The product should not be dumped in nature but collected and delivered according to local regulations.

**6.3. Methods and material for containment and cleaning up**

Spilled or released material should be collected mechanically and disposed of in suitable containers. Prevent dust generation.

**6.4. Reference to other sections**

For personal protection, see section 8.
For waste disposal, see section 13.

---

**SECTION 7: Handling and storage**

**7.1. Precautions for safe handling**

Good laboratory practices should always be used. Avoid contact with skin and eyes. Wear personal protective equipment to prevent skin and eye contact. Do not wear contact lenses when using this product. Avoid inhalation using local ventilation or appropriate filters.

**7.2. Conditions for safe storage, including any incompatibilities**
