

BRISTLEBOT LAB

Student Lab Page

1. Testable Question.

How do the positions of the Bristlebot legs impact its movement?

2. Background Knowledge.

What is the difference between a dependent and independent variable?

What is a controlled variable?

3. Hypothesis.

If (independent variable), then (dependent variable), because (rationale).

4. Materials.

- 1 pre-cut toothbrush head -
- 1 double-sided tape strip -
- 1 vibrating pager motor -
- 1 coin cell battery -
- 2 googly eyes -
- 2 chenille stems -
- -
- -

5. Procedure.

- a. Write out all of the instructions before you begin.
- b. Gather all materials.
- c. Construct your Bristlebot using the given materials and instructions.
- d. Try the Bristlebot to make sure that it is moving alright.
- e.
- f.
- g.
- h.
- i.
- j.
- k. Complete a lab report with all of the required sections.

6. Observations /Data / Results.

BOTH LEGS POINTING DOWN

Independent Variable - Sketch of Bristlebot's **legs**

Dependent Variable - Sketch of Bristlebot's **movement**

ONE LEG POINTING DOWN, ONE LEG FOLDED FLAT

Independent Variable - Sketch of Bristlebot's **legs**

Dependent Variable - Sketch of Bristlebot's **movement**

ONE LEG POINTING DOWN, ONE LEG OFF THE GROUND

Independent Variable - Sketch of Bristlebot's **legs**

Dependent Variable - Sketch of Bristlebot's **movement**

TWO LEGS FOLDED FLAT

Independent Variable - Sketch of Bristlebot's **legs**

Dependent Variable - Sketch of Bristlebot's **movement**

ONE LEG FOLDED FLAT, ONE LEG OFF THE GROUND

Independent Variable - Sketch of Bristlebot's **legs**

Dependent Variable - Sketch of Bristlebot's **movement**

TWO LEGS OFF THE GROUND

Independent Variable - Sketch of Bristlebot's **legs**

Dependent Variable - Sketch of Bristlebot's **movement**

7. Conclusion.

Write a paragraph to summarize your results. Include at least a sentence answer for each of the following:

- a. What is the question for this lab?
- b. What was the hypothesis?
- c. Was the hypothesis supported? Why or why not?
- d. What is your interpretation of the data? What did you see happening?
- e. What are some possible errors made and improvements that could be made to this lab?
- f. Further directions: What is something slightly different that could be tested next time?

ELABORATION PAGE

1. Using your knowledge of the movements when the legs are in various positions, you are going to attempt to hit all three bullseyes in 10 seconds.
2. As a group, discuss which leg configuration you think will be able to hit all three.
3. Start the Bristlebot in the center and release.
4. If unsuccessful, try again until you are able to get all three.

LAB REPORT SELF-EVALUATION

Make sure all of the answers to the questions are Yes, Sí, or はい.

Question/Problem/Purpose - Is your question testable? - Is it <u>not</u> a yes/no question?	/ 3
Observation/Background Research - Did you include notes, info or observations?	/ 3
Hypothesis - If _____, then _____, because _____.	/ 3
Procedure - Did you follow directions step-by-step?	/ 2
Materials - Is your list thorough and complete?	/ 2
Observations / Data - Did you include a data table? - Did you include a graph or visual representation? - Did you write a paragraph explaining your results? What do your results show? What specific evidence do you have? What are some potential errors?	/ 6
Conclusion - Did you restate the research question? - Did you restate the hypothesis? - Was the hypothesis supported? - What are some potential solutions to the errors? - What is a change that could be made to the lab to make it better or test something slightly different?	/ 6
TOTAL	/ 25
