# Paper Craft Jack-O-Lantern !
YOU WILL NEED:

TIME:
5-10 MINUTES

Paper
(Colorful
Construction Paper
or Card Stock.)

**Scissors or
Exacto Knife**

**Copper
Tape**

**2
LEDs**

**Glue, or
Adhesive Tape**
(To attach back layer)

**1
Battery**

BUTTON CELL +

**1 Paper
Clip**

Make an adorable Halloween Friends with glowing LED eyes from conductive tape and paper with Brown Dog Gadgets Conductive Tape Kit.
1 ## CUT JACK-O-LANTERN
Cut out the jack-o-lantern template. Trace on colored paper. Then cut out the shapes you traced.

2 ## INSERT LED's
Cut a tiny slit in the paper for the eyes. Stick the longer leg through the slit so there is one leg on each side of the paper.

(FRONT)   (BACK)

Please visit www.BrownDogGadgets.com for more great ideas & info.

③ APPLY COPPER TAPE

On the front side add tape diagonally from each LED towards the tab . Secure the LED leg with a tape sandwich. On the back side add tape diagonally from each LED towards the tab. Secure the back leg in a tape sandwich.

Sticky side down

Copper tape Sandwich

(FRONT)

(BACK)

④ ATTACH BATTERY

Place a battery at the end of the tape below the tab (+ side up). Fold the tab to cover the battery. Your LED should light up! Use a paperclip to hold the battery in place.
Decorate:
Add eyes, mouth and stem (the round end will go under the paperclip) . Use template to trace on color paper and cut . Tape or glue the pieces onto your Jack-o-lantern .

If your LEDs do not light up
- Make sure tape is touching the battery on each side
- Make sure one piece of tape is not touching both sides of the battery
- Try flipping the battery over (+ side down)

If only one LED lights up
- Make sure both LEDS have a good connection
- Flip the battery over. If the other LED now lights up, the long leg is on the wrong side
