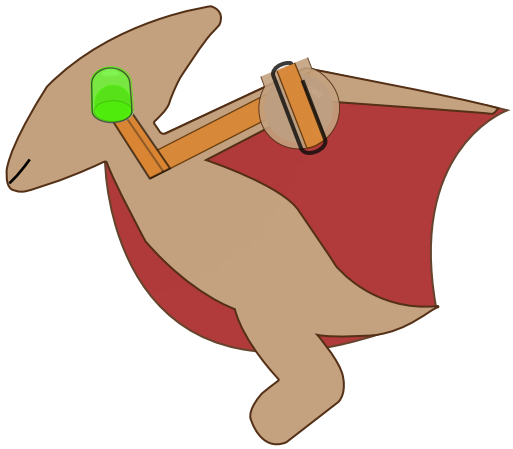
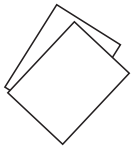
Dino Friend !

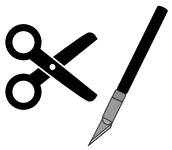


YOU WILL NEED :

TIME:
20-30 MINUTES



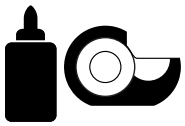
Paper
(Colorful Construction Paper or Card Stock.)



Scissors or Exacto Knife

Copper Tape

1 LED



Glue, or Adhesive Tape
(To attach back layer)

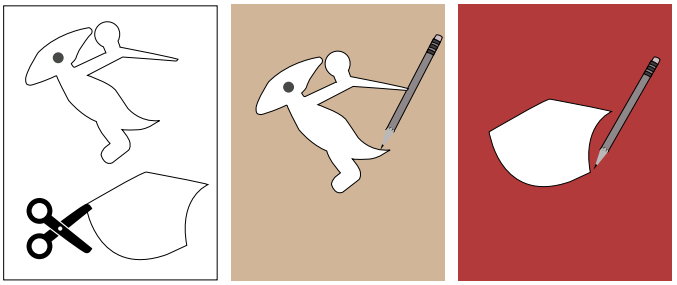
1 Battery

1 Paper Clip

Make an adorable Dinosaur Friend with a glowing LED eye from conductive tape and paper with Brown Dog Gadgets Conductive Tape Kit.

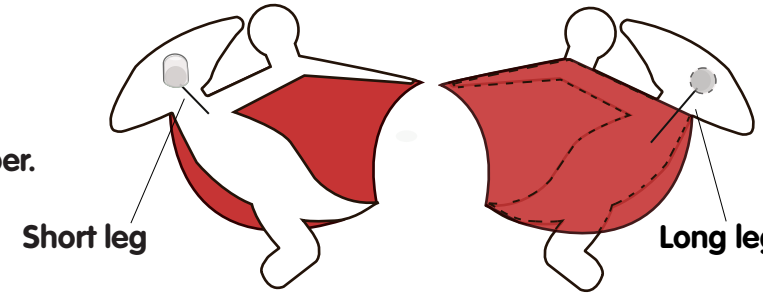
1 CUT OUT & ASSEMBLE

Cut out the Pterodactyl template and trace on colored paper. Then cut out the shapes you traced. Tape or glue the shapes together.



2 INSERT LED's

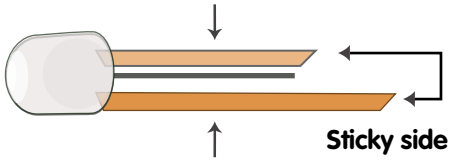
Cut a tiny slit in the paper for the eye
Stick the longer leg through the slit,
so there is one leg on each side of the paper.



Please visit **www.BrownDogGadgets.com** for more great ideas & info.

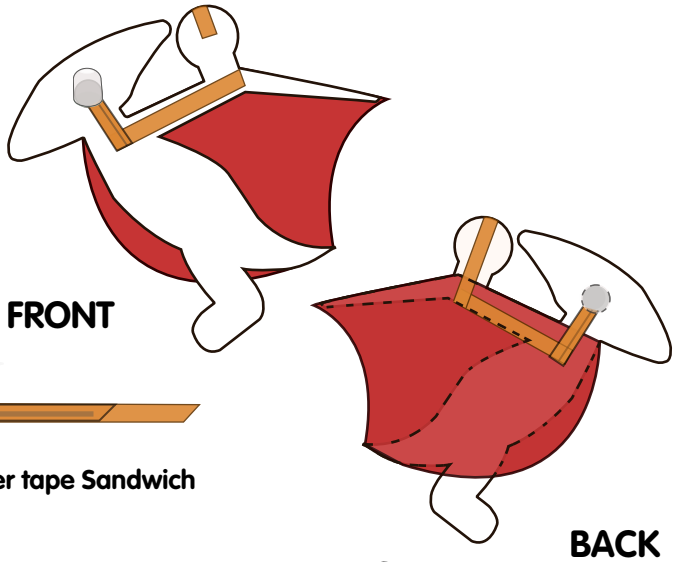
3 APPLY COPPER TAPE

On the front side add tape from the LED to the wing as shown. Secure the LED leg with a tape sandwich. On the back side add tape from the LED up to the tab and folded to the front. Secure the back leg in a tape sandwich.



Sticky side down

Copper tape Sandwich



FRONT

BACK

4 ATTACH BATTERY

Battery

Place a battery at the end of the tape below the tab (+ side up). Fold the tab to cover the battery. Your LED should light up!
Use a paperclip to hold the battery in place.

If your LED does not light up

- Make sure tape is touching the battery on each side
- Make sure one piece of tape is not touching both sides of the battery
- Try flipping the battery over (+ side down)

You're all set. Decorate your Dino Friend however you want!
