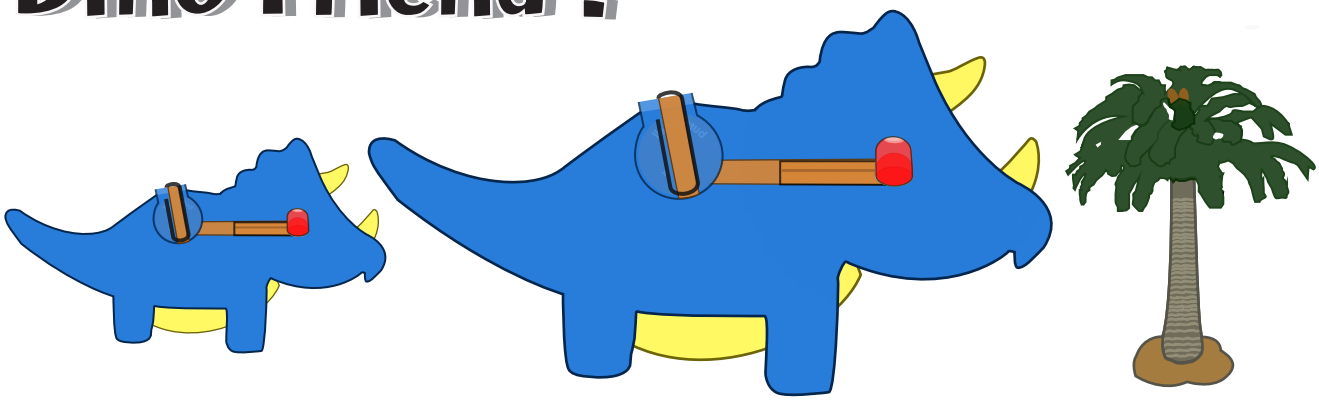
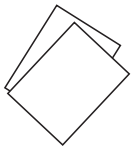
Dino Friend !

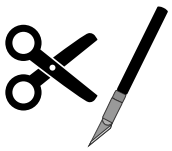


YOU WILL NEED :

TIME:
20-30 MINUTES



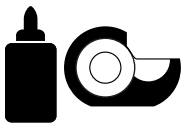
Paper
(Colorful Construction Paper or Card Stock.)



Scissors or Exacto Knife

Copper Tape

1 LED



Glue, or Adhesive Tape

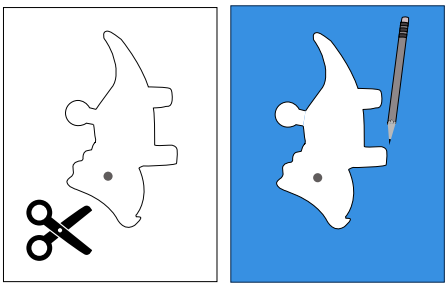
1 Battery

1 Paper Clip

Make an adorable Dinosaur Friend with a glowing LED eye from conductive tape and paper with Brown Dog Gadgets Conductive Tape Kit.

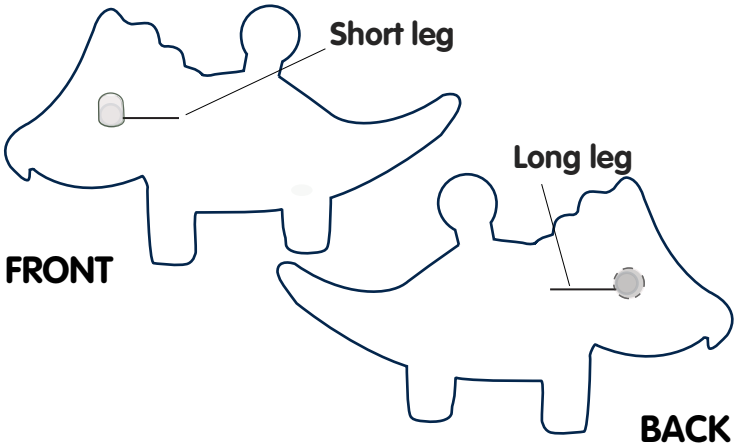
1 CUT OUT TRICERATOPS

Cut out the dino template and trace on colored paper.
Then cut the shapes you traced.



2 INSERT LED's

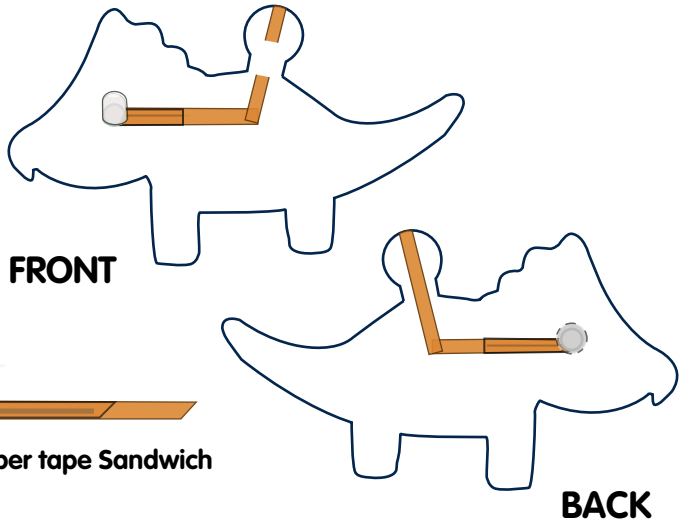
Cut a tiny slit in the paper for the eye.
Stick the longer leg through the slit, so there is one leg on each side of the paper.

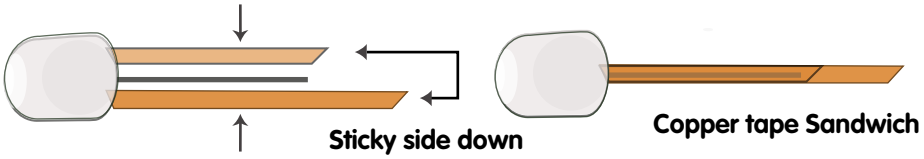


Please visit www.BrownDogGadgets.com for more great ideas & info.

3 APPLY COPPER TAPE

On the front side add tape from the LED toward the tab. Secure the LED leg with a tape sandwich. On the back side add tape from the LED up the tab, and folded to the front Secure the back leg in a tape sandwich.





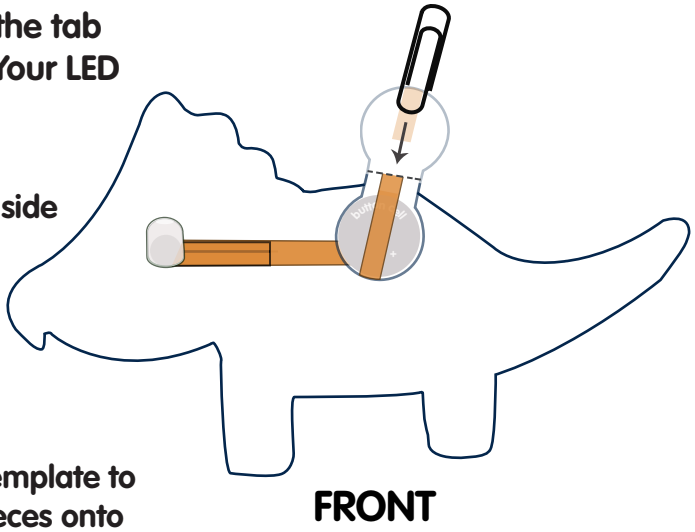
4 ATTACH BATTERY & DECORATE

Battery

Place a battery at the end of the tape below the tab (+ side up). Fold the tab to cover the battery. Your LED should light up!

If your LED does not light up

- Make sure tape is touching the battery on each side
- Make sure one piece of tape is not touching both sides of the battery
- Try flipping the battery over (+ side down)



Decorate:

Add spikes and a belly to your Triceratops. Use template to trace on color paper and cut. Tape or glue the pieces onto the back your Triceratops.

You're all set. Decorate your Dino Friend however you want!
