57

A fabrication process whereby air voids of different sizes and configurations are composed within a larger mass of dark grey or white opaline glass. These air pockets are invisible when the piece is unlit, and come alive to reveal an interior universe when 57 is illuminated. By virtue of the method of making, each 57 is completely unique.

Lamping

1.5w LED
(additional 0.18w LED light source for light mirrored and white opaline pendant)

Material

Blown and dipped glass, cast borosilicate glass cap, electrical components
