

±130 (5.1')

70 (2.75')

±150 (5.9')

PENDANTS: one

MOUNTING: metal mounting plate 70mm (2.75") in diameter

LAMPING: 1w LED

INSTALLATION: threaded on - wall or ceiling mount

MATERIALS: blown glass, copper mesh, electrical components, metal mounting plate

WEIGHT: approximately 0.7kg (1.5lb)

POWER SUPPLIES: remote mounted. Drivers included

DESCRIPTION

The 's' designation in this variation on the 76 refers to it being surface-mounted, with drivers mounted remotely. This surface light has a discrete 70mm (2.75") mounting plate designed for installation on walls or ceilings.

A vacuum is introduced to a strata composed of hot white and clear glass with copper mesh between. The vacuum causes the white layer to pull away through the embedded mesh, leaving numerous tendrils of white glass suspended within an interstitial space as it ages.

NOTES

- + Purchase replacement lamps online at www.bocci.com/shop/bulbs
- + Unless otherwise specified, a single class 2 driver will be sent for every 15 LED fixtures
- + Requires drivers to be remote mounted.
- + Please note that the copper mesh used within the 76 may be affected by heat and oxidization during the glass blowing process. These small oxidized edges can sometimes separate within the pendant; this is a natural characteristic of the metal and is seen as an evolution of the piece as it ages.

BOCCI

1

Mount driver remotely and route output wiring from driver to surface mounted light location.

Connect the black wire to live wire and white wire to neutral wire.

Note: Standard junction boxes are not compatible with the 76s. The surface mounted light cover plate mounts directly to the wall. Drivers must be remote mounted in a close by, accessible and hidden location for ease of long term maintenance. Installation to be done by certified personnel to ensure code compliance.

2

Drill a maximum 19mm (0.75") diameter hole.

Join driver wiring to back plate wiring using connectors provided.

3

Tuck wiring into wall opening and affix the back plate with fasteners provided.

Stagger the provided connectors so that they can be passed through the hole.

Turn power to fixture on.

4

Bocci 1w LED lamp included.

Insert LED lamp into flexible copper extender.

Push the flexible copper extender wires through the open slot on the sconce plate and plug end into the sconce socket.

Ensure power to lamp is working correctly.

Note: when using a dimmer use only low voltage electronic dimmers to ensure the fixture works properly.

5

Hold lamp wires against the wall to ensure they do not interfere with spinning glass.

Gently thread glass hemisphere onto cover plate. Do not over tighten.

Bend the insulated wires and insert the lamp into the small hole in the pendant. Ensure that the lamp does not touch the inner glass bubble.

Note: when using a dimmer use only low voltage electronic dimmer.

6

Clean fingerprints from surfaces.
